Department of Defense OFFICE OF PREPUBLICATION AND SECURITY REVIEW

DEFENSE MANPOWER PROFILE REPORT

Fiscal Year 2024

Prepared by Office of the Assistant Secretary of Defense for Manpower & Reserve Affairs

Total Force Manpower & Analysis Directorate

May 2023

The estimated cost to develop and produce this report for the Department of Defense is approximately \$73,000 for the 2024 Fiscal Year Report. This includes approximately \$73,000 in DoD labor.

Preface

Introduction

The Department of Defense (DoD) hereby provides the Defense Manpower Profile Report (DMPR) for Fiscal Year (FY) 2024, as required by 10 U.S.C. § 115a. This DMPR also meets the reporting requirement of 10 U.S.C. § 129(c).

Organization of the Report

This report explains the DoD manpower requirements. The report is organized into five chapters.

• Chapter 1 contains an overview of the total number of Defense-wide personnel, both military and civilian. It provides a clear and succinct picture of manpower in the Department and provides the basis for the rest of this report.

• Chapter 2 shows the estimated manpower requirements by force and infrastructure categories for each of the Services along with details on military technicians, and manpower providing full-time support to the Selected Reserves, and in the Defense-level activities and accounts.

• Chapter 3 shows the flow of active duty officer and enlisted personnel through each of the Services for the current and next five FYs. It provides a general summary of the flow, listing beginning and end strength numbers by officer and enlisted grades. It also provides a more detailed look at retirements by pay grade and years of service.

• Chapter 4 contains manpower narratives from the Military Services and the defense Agencies. These manpower narratives provide information to satisfy reporting requirements under 10 U.S.C. § 129(c).

• Chapter 5 contains commissioned officer promotion plans and promotion opportunity rates for the Military Services.

Manpower Requirements Overview

Our Armed Services represent the most capable military forces ever assembled – enabled by an unmatched All-Volunteer Force. Each day, Soldiers, Sailors, Marines, Airmen and Guardians serve proudly throughout the world, often in harm's way. They are supported by thousands of DoD civilian employees and contractor personnel, many of whom serve alongside them in overseas locations.

In addition to fielding operating forces, the Department has a substantial commitment to supporting many other missions/organizations. Table 2-4 in Chapter 2 provides information concerning military manpower assigned outside the parent Services.

Manpower is not an independent investment but one that must be developed together with areas such as platforms, weapons, maintenance, and training to deliver capabilities. These capabilities drive manpower requirements. The Military Services each define their workload requirements to operationalize capabilities in a cost-effective manner. In addition to arriving at fiscally informed Total Force manpower solutions, we must continue to work to ensure Total Force policies—including standards, pay, education, training, non-monetary compensation, and quality of life, are aligned to attract, develop, and retain a ready and motivated All-Volunteer Force of Soldiers, Sailors, Marines, Airmen and Guardians.

The Total Force

Data in this report is broken down by various components that make up the Total Force. This section provides a description of the Total Force components to assist in understanding and interpreting the rest of the report.

The structure of our Armed Forces is based on DoD Total Force Policy that recognizes various components' contributions to national security. Those components include the Active and Reserve components, the civilian work force, contracted support services, and host-nation support.

• <u>Active Component (AC) Military</u>. The AC military are those full-time Service members who serve in units that engage enemy forces, provide support in the combat theater, provide other support, or who are in special accounts (transients, students, etc.). These men and women are on call 24 hours a day and receive full-time military pay.

• <u>Reserve Component (RC) Military</u>. The RC military is composed of both Reserve and Guard forces. The Army, Navy, Marine Corps, and Air Force Reserves each consist of three specific categories: Ready Reserve, Standby Reserve, and Retired Reserve. The Army and Air National Guards are composed solely of Ready Reserve personnel.

o <u>Ready Reserve</u>. The Ready Reserve consists of RC units, individual reservists assigned to AC units, and individuals subject to recall to active duty to augment the active forces in time of war or national emergency. The Ready Reserve consists of three subgroups: the Selected Reserve, the Individual Ready Reserve, and the Inactive National Guard.

□ <u>Selected Reserve (SELRES)</u>. The SELRES is composed of those units and individuals designated by their respective Services and approved by the Chairman, Joint Chiefs of Staff, as so essential to initial wartime missions that they have priority for training, equipment, and personnel over all other Reserve elements. The SELRES is composed of Reserve unit members, individual mobilization augmentees (IMAs), and Active Guard and Reserve (AGR) members. Reserve unit members are assigned against RC force structure, IMAs are assigned to, and trained for, AC organizations or Selective Service System or Federal Emergency Management Agency billets, and AGRs are full-time Reserve members who support the recruiting, organizing, training, instructing, and administration of the RCs.

□ <u>Individual Ready Reserve (IRR)</u>. The IRR is a manpower pool consisting mainly of trained individuals who have previously served in AC units or in the SELRES. IRR members are liable for involuntary active duty for training and fulfillment of mobilization requirements.

□ <u>Inactive National Guard (ING)</u>. The ING consists of Army National Guard personnel who are in an inactive status (the term does not apply to the Air National Guard). Members of the ING are attached to National Guard units but do not actively participate in training activities. Upon mobilization, they would mobilize with their units. To remain members of the ING, individuals must report annually to their assigned unit.

o <u>Standby Reserve</u>. Personnel assigned to the Standby Reserve have completed all obligated or required service or have been removed from the Ready Reserve because of civilian employment, temporary hardship, or disability. Standby Reservists maintain military affiliation but are not required to perform training or to be assigned to a unit.

o <u>Retired Reserve</u>. The category of the Reserve component consisting of those Reserve component members who have transferred after qualifying for non-regular retirement and not in receipt of retired or retainer pay; or those in receipt of retired or retainer pay for having achieved the requisite years of service, age of entitlement or physical disability.

• <u>Civilian Component</u>. Civilians include U.S. citizens and foreign nationals on DoD's direct payroll, as well as foreign nationals hired indirectly through contractual arrangement with overseas host nations. This category does not include those paid through nonappropriated fund (NAF) activities.

• <u>Contracted Services</u>. DoD uses contracted services to: (a) acquire specialized knowledge and skills not available in DoD; (b) obtain temporary or intermittent services; and (c) obtain more cost-effective performance of various commercial-type functions available in the private sector. Information related to the Department's use of contracted services as an element of its Total Force is reported in the annual summary report of the inventory of contracted services, submitted in accordance with 10 U.S.C. § 4505(c).

Departmental data in accordance with the inventory of contracted services requirement under 10 U.S.C. § 4505(c) is publicly available at: <u>https://www.acq.osd.mil/asda/dpc/cp/policy/service-contract-inventory.html</u>. The O&M Overview book, in support of the Department of Defense FY24 budget materials, can be found at <u>http://comptroller.defense.gov/Budget-Materials/</u>.

Chapter 1: Department Overview

The tables in this chapter provide an overview of Defense-wide manpower, both military and government civilian. They give the most succinct picture of manpower in the Department for the previous, current, and next FYs, and provide the basis for the rest of this report. A more specific summary of each table follows.

Table 1-1 gives an overview of total Department manpower for the previous, current, and next FYs broken down by Service, Active, and Civilians. Table 1-1 provides a picture of all Defense-wide manpower, which the rest of the tables in this report will expand upon in greater depth.

Table 1-2a shows the active component military manpower totals by personnel category (i.e. officer, enlisted, and cadet/midshipmen) for each Service for the previous, current, and next FYs.

Table 1-2b shows the same information as Table 1-2a for the RCs.

Table 1-3 shows the active military manpower assigned within a unit force-structure and projected strength estimates for categories of individuals not in the unit force-structure (consisting generally of transients, holdees, students, trainees, and cadets/midshipmen).

Chapter 2: Service and Defense-Level Summaries

The tables in this chapter show the estimated manpower requirements by force and infrastructure categories for each of the Services along with details on military technicians, numbers that provide full-time support to the Reserve, the manpower in the Defense-level activities and accounts, and manpower required to be stationed overseas and afloat.

Tables 2-1a through 2-1d depict end strength summaries for total military and government civilian manpower by force and infrastructure for the previous, current, and next FYs. The table is broken down into two halves. The first half contains force totals and three sub-categories of expeditionary forces, deterrence and protection forces, and other forces. The second half has the infrastructure totals in 11 sub-categories ranging from logistics and communication to training, science and technology. Each table also includes a grand total and the percentage of the total that the infrastructure represents.

Table 2-2 shows the numbers of military technicians assigned, authorized, and required by status and organization for the previous, current, and next FYs for the Army and Air Force. Totals are given in thousands for both high-priority units and other units for dual and non-dual status individuals.

Table 2-3 shows the full-time support to the Selected Reserve for the previous, current, and next FYs. Sub-totals for AGR, technicians, and civilian are given for each RC.

Table 2-4 shows the manpower in Defense-level activities and accounts for the previous, current, and next FYs. Components are organized in sub-categories of Office of the Secretary of Defense (OSD) level, Defense Agencies, Defense Field Activities, Other Defense-Wide Organizations, Joint Staff and Unified/Combined Commands, and Program Manager Manpower.

Chapter 3: Officer and Enlisted Flow Data

The tables in this chapter illustrate the flow of active duty personnel through the individual Services. There are a series of four tables presented for each Service. These tables include officer and enlisted gains and losses for the current and next five FYs and officer and enlisted retirements by years of service for the current and next five FYs. A more specific summary of each table follows.

In tables 3-1a through 3-1d and 3-3a through 3-3d, active duty gains and losses are presented for the current and next five FYs for each of the individual Services by officer and enlisted personnel categories, respectively. Each table includes beginning strength and various categories of gains and losses tabulated to determine the end strength at each grade.

In tables 3-2a through 3-2d, officer active duty retirements are presented by grade and years of commissioned service (YOCS) for the current and next five FYs for each of the individual Services. In tables 3-4a through 3-4d, enlisted active duty retirements are presented by grade and years of service (YOS) for the current and next five FYs for each of the individual Services. The tables are divided by officer grades (O-1 to O-10) and enlisted grades (E-1 to E-9) and years of service ranging from 1 to 30+.

Chapter 4: Manpower Narrative Justifications

United States Army Manpower Narrative

Introduction

The world is changing, and the Army is changing with it. The Army has refocused on deterring aggression against the pacing challenge in the Pacific and acute and persistent threats around the globe. The Army is coming out of 20 years of counter terrorism and counter insurgency and is transforming to fight large-scale combat operations in a multi domain operational environment.

The Army's military advantage is its Soldiers, Families, and Civilians. Its people are a critical part of realizing our vision for the Army of 2030 and we must ensure their care. Taking care of our people means creating a positive command climate, building cohesive teams that are highly trained, and reducing harmful behaviors in the workplace.

Strategic Priorities, Goals and Challenges

To meet the evolving challenges and threats, the Army is undergoing a once-in-ageneration transformation to develop the capability to converge effects on land, in the air, sea, space, and cyberspace. This transformation includes investments in our people, the reorganization of forces, the development of new equipment, and the adoption of new concepts on how to fight that allow the Army to maintain superiority over any potential adversary.

Key Workforce Issues

The Army must transform the way we recruit, train, educate, and prepare America's sons and daughters for an increasingly complex battlefield. The Army is building a twenty-first century, data-driven personnel management system to transform how we identify, develop, and manage the talent that is the bedrock of our military advantage. The Army of 2030 will improve upon our longstanding commitment to Soldiers with investments in advanced education, comprehensive health and fitness, and development of skills that will benefit them for life. The Army is leading the charge to develop prevention efforts for suicide, sexual crimes, and extremism while strengthening our support systems to care for those affected.

The Army is incentivizing its recruiting efforts through the Recruiter Production Incentive-Assignment Incentive Pay Pilot program (RPI-AIP). The RPI-AIP provides Army recruiters with monetary compensation for recruiting above their production numbers. The Army is also incentivizing our all-volunteer and young force with an increase in enlistment and retention bonuses, including providing greater loan repayment amounts. In addition, the Army is investing more funding to enhance our marketing and advertising efforts. All our efforts are toward the goal of recruiting and maintaining high quality talented Soldiers to fill cutting-edge formations and field new capabilities. Quality of life for our Soldiers, Families, and Civilians is important. The FY24 budget sustains quality of life investments for Soldiers, Families, and Army civilians through the continued improvements in barracks and housing, the Exceptional Family Member Program, and Child Development Centers. We are committed to providing, for those living on Army installations in the U.S. and overseas, safe, clean, and healthy homes.

As part of transforming the Army, there is a need for highly skilled and talented civilians to carry out the Army's future. We are ensuring the civilian work force is trained and ready. The Civilian Implementation Plan continues to transform the Army's civilian management approach. It places the right civilian in the right job to support the Army. We will maintain the best talent and provide civilians with access to the knowledge, skills, and training needed to support the ever-increasing demands of the Army. Civilians provide mission essential support, and they are key to transforming and defending the nation in the future.

Active Component, Reserve Component, and National Guard:

The Military Personnel, Army (MPA) appropriation budget request sustains the All-Volunteer Force by providing Regular Army basic and special pays, retired pay accrual, allowances for subsistence (rations) and housing, recruiting and retention incentives, permanent change of station moves, death gratuities, unemployment compensation benefits, as well as Reserve Officer Training Corps and United States Military Academy cadet stipends. There is minimal discretionary spending within the MPA appropriation as over 90% of expenditures support must-fund payroll costs. The FY24 budget request supports Army manning goals by providing mission and location specific entitlements for Soldiers and their Families across the world. The request includes critical force shaping tools, to include \$1.4B in bonus and special pays necessary to recruit and retain talent to sustain the all-volunteer force.

The National Guard Personnel, Army (NGPA) appropriation supports individual, collective, and pre-mobilization training for traditional and full-time Active Guard and Reserve (AGR) Soldiers. Major programs include Annual Training, Inactive Duty for Training, schools, special training (e.g., Combat Training Center rotations), above statutory Operational Reserve training days, and additional opportunities that build readiness. The appropriation also funds education benefits and incentive programs that support sustaining a quality force. The FY24 budget request supports the National Guard Bureau's priorities of people, readiness, and modernization. As the combat reserve of the Army, the Army National Guard (ARNG) continues to support the active force in sustaining joint operations through a responsive and ready force-generating capability. ARNG readiness continues to provide both federal and state support in response to domestic emergencies, including hurricanes, wildfires, and other requirements in addition to Overseas Operations.

The Reserve Personnel, Army (RPA) budget request aligns resources in support of the National Defense Strategy. The Army Reserve's focus on People, Readiness, Modernization, and Allies and Partners drives the prioritization of funding to provide combat ready units and Soldiers for the Total Army and Joint Forces to deploy, fight, and win across multi-Domain operations against current and emerging threats. Post pandemic, the current resourcing strategy focuses on resuming individual and collective training to maintain and improve readiness while balancing risk-to-mission and risk-to-force. The FY24 budget request provides essential funding for Army special focus programs including the Sexual Harassment/Assault Response and Prevention Program, Suicide Prevention, Family Support, and Transition Programs. These resources will fund the pay and allowances for full-time AGR and part-time Reserve Soldiers performing duty in several training categories, including Inactive Duty Training, Annual Training, Active Duty for Training, and Active Duty for Operational Support.

The FY24 Budget Request

• Supports a Total Army military end strength of 951,800

• Regular Army: 452,000

Army National Guard: 325,000

• Army Reserve: 174,800

• Provides a 5.2% military basic pay raise, 3.9% basic allowance for housing increase, and 3.4% basic allowance for subsistence increase

• Resources officer, enlisted, and cadet pay and allowances, permanent change of station moves as well as other personnel costs, such as unemployment compensation

• Provides incentives, such as bonus, education benefits, and student loan repayments, to recruit and retain the quality all volunteer force

• Provides incentive payment for Soldier referrals and for top-performing recruiters

• Provides payment into the Medicare-Eligible Retiree Health Care Fund for eligible beneficiaries and their dependents and survivors

• Resources the Future Soldier Prep Course and recruiter selection and training improvements

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 195,411 | 23,943 |
| FYDP Year 1 (FY 2024): | 195,495 | 25,146 |
| FYDP Year 2 (FY 2025): | 193,818 | 25,692 |
| FYDP Year 3 (FY 2026): | 193,213 | 26,161 |
| FYDP Year 4 (FY 2027): | 193,337 | 26,732 |
| FYDP Year 5 (FY 2028): | 193,322 | 27,287 |

Army Civilians are an integral part of mission readiness and support critical capabilities not requiring military essential skills or personnel. The following are examples of jobs and capabilities Army Civilians perform to support Service Members: Combat Training Centers, range maintenance and operations, acquisition and modernization, cyberspace operations, facilities operations and sustainment, Family services, prevention programs, prepositioned stocks, security services and force protection, depot maintenance and arsenal operations, and administrative activities. The increase in the number of civilian employees reflects the Army's priorities. For example, in support of the Secretary of the Army's objective to Reduce Harmful Behaviors and the Independent Review Commission (IRC) recommendations as approved by the Secretary of Defense, the Army is restructuring the Army's Sexual Harassment/Assault Response and Prevention (SHARP) program and implementing a full-time Prevention Workforce across the Active Component, Army Reserve, and Army National Guard. As part of the Secretary of the Army's objective to Adapt, Recruit, and Retain, the Army will evaluate recruiting, retention, and incentives to attract high-quality Civilians and match their skills, behaviors, and preferences with the right jobs. The Army values its motivated and dedicated Civilian workforce. The Army seeks highly skilled Civilians who are innovative, agile and results driven. The Army budgeted a 5.2% pay raise for its Civilian personnel in FY24.

Conclusion

People are the U.S. Army's greatest strength. The Army's FY24 budget request prioritizes resources to take care of our people, build readiness, and deploy a more lethal and ready Total Army focused on Joint All-Domain Operations to achieve the Army of 2030 to win the current and future fight. The Army is committed to leadership and rather than the industrial age system of assigning people to jobs based on a few factors, the Army of 2030 will use an individual's skills, education, experiences, and personal attributes to match them with positions where they can best contribute. The Army is also investing in programs and education, such as the Commander Assessment Program, to improve how leaders identify their own strengths and weaknesses and allow their organizations and their people to thrive.

United States Navy Manpower Narrative

Introduction

This request details the requirements needed for Navy to deliver the fleet our Nation needs. This investment will help us turn the corner on readiness to meet strategic competitors in peace and war, ensuring our ability to maintain free and open oceans and the international, rules-based order. Consistent, steady resourcing remains necessary to reinforce our shipyards and provide clear signals to industry on the way ahead. Navy's Active Component personnel requirements are driven by platform investments and support capabilities that support the National Defense Strategy and maintain the warfighting advantage to defend the nation for decades to come. The FY24 budget request funds an end strength of 347,000, which is the maximum feasibly achievable end strength given the current recruiting environment. The end strength required to sustain the current force structure is greater than the FY24 budget request.

Navy's advantage comes from the efforts of the 347,000 Active, 57,200 Reserve Sailors, and 204,750 Navy Civilian Full-Time Equivalents (FTEs) and their families. This request reflects sustainment in both military and civilian personnel requirements driven by Navy's force structure (ships/aircraft/submarines) in addition to enabling and supporting required capabilities. Navy remains focused on implementation of Diversity, Equity, and Inclusion efforts for our recruits so that we actively include all perspectives to harness the creative power of diversity, accelerating the Navy's warfighting advantage while improving quality of life and service in support of current fleet manning requirements.

Strategic Priorities, Goals and Challenges

Since early 2017, the Navy prioritized investments supporting long-term strategic competition by increasing focus on Navy personnel and fleet ships. Total Active Component Navy personnel increased from 322,900 in FY17 to 354,000 in FY23. However, a robust economy, COVID-related impacts, and higher than expected National Defense Authorization Act (NDAA) enlisted manning numbers in FY22 and FY23, challenge the Navy's ability to maintain current manning levels and reduce gapped sea duty billets. FY24's NDAA End Strength of 347,000, while a decline from FY23, mirrors the strength levels of FY20 to FY21, a naval force at its highest peak since FY06.

The Navy's unique roles and responsibilities require them to deliver a more ready, more capable, more lethal, and larger fleet in order to maintain our advantage at sea and protect American interests across the spectrum of conflict. As stated in the Chief of Naval Operations Navigation Plan, the United States Navy continues to face pacing, acute, and persistent challenges to our national security from the People's Republic of China (PRC) and Russian Federation (RF). The PRC and RF endeavor to undermine the freedom of the seas that has benefitted the globe since the end of the Cold War and will attempt to outpace and overwhelm the United States in this long-term competition. However, the Navy will deter aggression, fight, and win with the greatest warfighting asset that can outthink and outfight any adversary: its people. The Navy will continue to leverage and build a talented workforce to maintain an advantage against all persistent threats, while ensuring alignment with national, defense, and naval strategic guidance. The Navy will continue to responsibly fund readiness, as it sustains the Fleet without fielding a hollow

force. To counter the slight decline of first-term enlisted Sailors with 0-6 years of service (Zone A), the Navy's readiness efforts include implementing additional force management policies along with monetary and non-monetary incentives to keep the best and brightest in the service. Additionally, Navy incentivizes all Sailors to fill operational requirements, while continuing to optimize talent management by transforming our distribution and advancement processes into a market driven, billet-based talent management system. In support of sustaining Navy's growth and cementing operational readiness, MyNavy Human Resources (HR) continues efforts to ensure the Fleet is properly manned, with the right Sailors, in the right place, at the right time, with the right training. Navy's funding request will sustain the Active and Reserve Component to include Training and Administration of the Reserves end strength, fund special and incentive pays, increase operational manning, invest in the education of Sailors, and modernize personnel services delivery systems. It is imperative that the Navy constantly evaluates and improves its capabilities to achieve the mission, as well as understand the vital importance of taking care of Sailors and the civilians who enable them - as they are the true source of naval power.

As the United States economy remains in a historically low unemployment environment, accessing enlisted Sailors in specific high-demand fields will continue to be a challenge, this includes Nuclear Field, Cyber Warfare, Special Warfare/Operations, Submarine, and certain aviation specialties. Assessing officers for the Judge Advocate General's Corps and Medical Corps will also continue to be a challenge. MyNavy HR must continue to develop and improve recruiting strategies for all demographic groups and find ways to best leverage incentives to attract and retain personnel.

Enriching a Sailor's career by providing exceptional service and improving the way in which Sailors receive human resource services maintains our competitive edge to produce and retain warfighters while enhancing readiness. This has placed further emphasis on the efforts to improve retention and recruiting for critical community skill sets including Nuclear Field, Special Warfare, Advanced Electronics, Aviation Maintenance, Information Warfare, and the Submarine Force. Similarly, the Navy continues to focus on retaining officers in the Aviation, Surface Warfare, Submarine, and Special Warfare communities by employing several retention programs, including the Career Intermission Program, merit reorder, bonuses for high demand career fields, promotion deferment, graduate education, and fellowship programs. These skills continue to be challenging to attract and retain in the current job and education markets, requiring a proactive recruiting and retention strategy that includes monetary and non-monetary incentives.

To secure our advantage at sea, the Navy will continue to attract, develop, and manage the best and brightest talent while developing a campaign to Advance Navy Culture which counters destructive behaviors and champions signature behaviors to ensure a Navy that can fight and win. Through the optimization of talent management, MyNavy HR will achieve talent acquisition excellence, provide Sailor-centric initiatives, and reshape the Navy into a leader of diversity, equity, and inclusion. Navy manpower investments are designed to create a Navy that is ready to win across the full range of military operations in competition, crisis, and contingency by persistently operating forward with agility and flexibility in an all-domain battlespace.

Key Workforce Issues

Active and Reserve Manpower

Navy's FY24 budget request funds a Navy end strength of 347,000 Active and 57,200 Reserve Sailors. Navy remains on track for full implementation of the lessons learned from the 48 Task Force One Navy initiatives to further Diversity, Equity, and Inclusion efforts. The we must actively include all perspectives to harness the creative power of diversity, accelerating the Navy's warfighting advantage while improving quality of life and service, in support of current fleet manning and sustainment of the force. Active Navy end strength continues to adjust and align to overall force structure changes while supporting an environment of sustainment despite: the introduction of new platforms and capabilities; increases in billets authorized on operational platforms; adjustments to address lessons learned from our collisions at sea; and continuing efforts to reduce gaps in fleet manning.

Specific Manpower Changes increases funding to support:

- Enlisted Student Individuals Account Investment in FY24 only
- Retain LSD-47/48 until FY25 and LSD -49/50/51/52 across the FYDP
- Medical End Strength Restoral
- Restore 5 Expeditionary E/A-18G Squadrons across the FYDP
- Retain LCS-13/15/17/19 until FY25 and LCS-3 until FY25
- Restore LCS Shore Infrastructure until FY25
- Restore Dual Crews on Expeditionary Sea Bases across the FYDP
- Extend Blue/Gold Crew for LCS INDEPENDENCE Variant MCM Ships
- MTS/Submarine Availability/Inactivation/New Construction
- Restore E/S to VX-1 and VX-9 Operational Test Squadrons in FY24 only
- Fund Increased MPN for Counter Small Unmanned Aerial Systems
 Operational Embedded Mental Health and other Mental Health shortfalls
- Fund LHD-1 class manpower to 95% of requirements

Civilian Manpower

The Department of the Navy (DON) mission to recruit, train, equip and organize requires Total Force Management—a mix of Sailors, Marines, civilians, and contractor personnel necessary to provide the Navy the Nation needs. As it adds lethality and capability, it must maintain a balanced approach and recognize that adding maritime, aviation and unmanned platforms requires an increase in the civilian workforce. Implementing this approach requires increasing people to maintain the equipment: shipyard workers to aviation mechanics; engineers to develop and test enhancements to communications, radar, and weapons systems; and scientists to design the weapons and platforms of the future.

The FY24 budget request reflects a balance between maintaining readiness, building the fleet of the future, and taking care of people. To accomplish this, the budget includes growth in the ship maintenance workforce to meet scheduled maintenance, reduce potential backlogs, and increase maintenance availabilities through the FYDP. Additionally, the DON is committed to providing support services for at-risk populations to reduce incidents of destructive behavior by increasing personnel for Sexual Assault Prevention and Response program offices.

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 203,778 | \$28,700 |
| FYDP Year 1 (FY 2024): | 204,750 | \$30,500 |
| FYDP Year 2 (FY 2025): | 201,960 | \$30,700 |
| FYDP Year 3 (FY 2026): | 201,735 | \$31,400 |
| FYDP Year 4 (FY 2027): | 201,476 | \$31,700 |
| FYDP Year 5 (FY 2028): | 201,560 | \$32,800 |

The civilian requirements decrease of 4,150 FTE in future years is attributed to efficiency and reform efforts, not related to military-to-civilian conversions or insourcing.

Conclusion

This year's budget request represents a portfolio of investments that employ our available resources to best implement our initiatives to the maximum level that is achievable in today's challenging recruiting environment. To secure the advantage at sea and win in strategic competition, the Navy must continue to attract, recruit, develop, assign, and retain a highly skilled workforce. By modernizing the Sailor experience and Advancing the Navy Culture, it will provide exceptional service to Sailors and families while actively engaging, elevating, and inspiring all personnel to be their best by leveraging diversity of thought, talent, and people. The MyNavy HR enterprise and support programs are postured to best support Active and Reserve Sailors, our civilian workforce, and their families.

United States Marine Corps Manpower Narrative

Introduction

The Commandant of the Marine Corps' (CMC's) vision is expressed in the Commandant's Planning Guidance (CPG) and states that the U.S. Marine Corps will be trained and equipped as a Naval Expeditionary Force-in-Readiness and prepared to operate inside actively contested maritime spaces in support of Fleet operations. In crisis prevention and crisis response, the Fleet Marine Force – acting as an extension of the Fleet – will be first on the scene, first to help, first to contain a brewing crisis, and first to fight if required to do so. The Marine Corps also provides expeditionary forces within an adversary's weapons engagement zone in support of sea control and to defeat a "fait accompli" gambit should deterrence fail.

Partnered with the Navy, the Marine Corps provides a fundamental pillar of the Nation's power and security – the ability to project power freely across the seas. The military manpower in the Marine Corps' FY24 President's Budget request will support end strengths of 172,300 in the AC and 33,600 in the RC. Marines serve forward to shape events, engage with partners, manage instability, project influence, respond to crises, and deter potential adversaries. As a force, the Marine Corps must remain ready to fight and win across the range of military operations and in all five domains - maritime, land, air, cyber, and space. The Marine Corps' role as "America's 9-1-1 Force" informs how we man, train, and equip the Force. It also drives how the Service prioritizes and allocates the resources provided by Congress. A balanced Marine Corps is a Force that has a sustainable operational tempo and is able to train with the right equipment for all assigned missions. There will be an estimated 22,188 Civilian Marine FTE employees in FY24. A critical asset to the Marine Corps Total Force team, they provide traditional services to base and station operations and indispensable support to our Marines and their families, especially to the Marines returning from deployment.

In the past year, the Marine Corps conducted activities in support of 17 named operations, participated in 11 amphibious operations, engaged in 69 theater security cooperation events/programs, and participated in 106 named exercises. Amphibious Ready Groups/Marine Expeditionary Units conducted operations in support of combatant commands (CCMDs) along-side regional partners providing a range of deliberate and crisis response options. The Marine Corps provided crisis response and contingency operations for AFRICOM, EUCOM, CENTCOM, SOUTHCOM and INDOPACOM. In January 2022, Marine Fighter Attack Squadron (VMFA) 314 became the first Marine Corps squadron to deploy the F-35C Lightning II Joint Strike Fighter aboard an aircraft carrier, deploying 10 F-35Cs onboard the USS ABRAHAM LINCOLN in INDOPACOM. Following Russia's invasion of Ukraine in February 2022, elements of 2d Marine Aircraft Wing integrated within assure and deter activities in EUCOM by providing air surveillance, multi-domain awareness, and air policing in support of NATO operations. In response to Presidential Drawdown Authority for military assistance to Ukraine, as of December 2022, the Marine Corps provided various equipment and munitions valued at \$1.96 billion.

Strategic Priorities, Goals and Challenges

The Marine Corps continues to vigorously redesign the Force for Naval Expeditionary Warfare in actively contested spaces, aligning the Service with the National Defense Strategy (NDS). The Marine Corps' principal challenge remains to be effective as the nation's Naval Expeditionary Force-in-Readiness, while simultaneously modernizing the Force for the future operating environment with available resources. A Naval Expeditionary Force-in-Readiness must be able to compete, deter, and facilitate horizontal escalation. Playing that role while simultaneously modernizing the Force in accordance with the needs of the Fleet and the decisions made by civilian leadership are the primary challenges. The Marine Corps will succeed and will create irreversible momentum with the modernization efforts. In FY24, the CMC's continuing and comprehensive modernization effort of Force Design 2030 (FD 2030) will also include a focus on talent management.

Talent management is the act of aligning the talents of Marines with the needs of the Service to maximize the potential of both - increasing Marine Corps combat capability and readiness. Talent Management 2030 (TM 2030) describes a fundamental redesign of our personnel system in order to maximize the number of fully trained, qualified, experienced, and deployable Marines in the operational forces for any given budget. Like Force Design, TM 2030 will be a multi-year effort – a Service-wide strategic design process that the Marine Corps has already begun to execute. The priorities of TM 2030 are to build and retain the talented force, manage and develop the talented force, and inform and interface with the talented force. The Marine Corps' performance in future battles will be defined by the investments made today and in the coming years. The Marine Corps is focused on increasing readiness for 21st-Century conflict and crisis response. All actions are measured against the benchmark of providing more fully-trained, experienced, deployable Marines in the Fleet Marine Force – with a capable supporting establishment – for any given level of resourcing.

Key Workforce Issues

As "America's 911 Force" and the Nation's force-in-readiness, the Marine Corps is undergoing a comprehensive modernization effort through FD 2030. This effort will ensure the Service is able to meet its statutory role and be ready to respond to crises - across the range of military operations - from active campaigning to conflict. The warfighting capabilities sought are theater agnostic. As FD 2030 is refined, the Marine Corps is transitioning to a new concept for stand-in-forces (SIF) which will determine how forward-postured forces - operating in contested areas, capable of transitioning rapidly from campaigning, to crisis, to conflict, and back again can create strategic advantage for the joint force.

The enduring SIF function is to help the fleet and joint force win the reconnaissance and counter-reconnaissance battle at every point on the competition continuum. The modernization effort will enable the Marine Corps to operate, fight, and win in a more diverse and larger set of scenarios and geographic regions than today. The Marine Corps is and will remain "most ready when the Nation is least ready" and a force-in-readiness prepared to respond to any crisis, anywhere, at any time.

The Marine Corps is basing its institutional changes and modernization decisions on a long-term view of strategic competition with peer adversaries, which, in turn, demands that Marines achieve their warfighting potential. Through the development of a robust talent management system, the Marine Corps has deliberately shifted its focus to greater retention and targeted maturation of small unit leaders and technically skilled personnel to increase return on investment and capability. The enhanced capabilities of these Marines will prepare them for success on 21st Century battlefields and earn the Marine Corps greater returns on investment.

Although the officer and prior service recruiting missions are on a similar trajectory of success as achieved in FY22, the prevailing recruiting headwinds in the enlisted non-prior service market could result in a difficult year. These challenges are exacerbated by a historically low start pool entering FY23. While the Marine Corps continues to meet accession goals, the Service has yet to achieve a contracting pace that will fully replenish the start pool. To mitigate risk, the Marine Corps made a calculated move to reduce FY23 AC end strength from the authorized level of 177,000 to a planned level of 172,300 to lower direct shipping requirements and enable the recruiting force to focus on the quality high school market. The Reserve Component's planned end strength level was lowered, also, and to mitigate strength losses the Marine Corps fostered a revitalized Total Force effort to transition Marines separating from the Active Component directly into the Reserve Component and supported the development of other Reserve incentives. Recruiting is just one piece of the end strength puzzle and the Marine Corps is continuously reviewing the entire manpower ecosystem for policy, force structure, and retention options to reduce dependence on new accessions.

The Marine Corps' most stressed career fields, with the longest training timelines, include Intelligence, Communications and Cyber. This is partially due to the concurrent high demand for these types of skills in the civilian sector. These career fields are closely monitored to retain the most highly qualified Marines. The Service continues to emphasize and energize leadership awareness on retention to ensure the requisite numbers of the very best Marines are capable of fulfilling leadership and operational requirements. The Service continues to shift to a retentionfocused paradigm to move towards retaining an increasing number of Marines who have innate ability, skills, and commitment to continued service to meet FD 2030. The Marine Corps achieved both the FY23 First Term Alignment Plan and the Subsequent Term Alignment Plan reenlistment goals.

Incentive pays remain critical to the Marine Corps' retention effort, allowing the Service to fill hard to recruit positions, such as cyber security technicians and counter intelligence specialists. Similarly, Selective Reenlistment Bonuses (SRBs) allow the Marine Corps to shape the career force. SRBs target critical Military Occupational Specialties (MOSs), support lateral movement of Marines into these MOSs and compete in the market of human resources with the civilian sector. The Marine Corps is experiencing a shortage in certain types and grades of aviators to fill all aviation MOS requirements. The Aviation Bonus seeks to stabilize pilot inventory levels by offering bonuses to the Fixed Wing and Tiltrotor communities that are currently experiencing inventory shortfalls. Additional retention challenges exist in the Rotary Wing and Weapons System Officer communities, whose officers shoulder the majority of non-flying billets and where a drop in production or retention may cause additional manpower shortfalls.

Active Component

The FY24 President's Budget request supports a Marine Corps Active Component end strength of 172,300. Despite the recent headwinds of COVID-19 and nationwide recruiting challenges, the Marine Corps plans to set and sustain the FD 2030 modernization effort in its force structure and alignment. Two priorities in this effort are the discrete elements of Talent Management and Training & Education.

Central to the role in providing a lethal force is recruiting the most qualified men and women within the Nation who are willing to raise their hand, affirm an oath, and wear the eagle, globe, and anchor. The Marine Corps will ensure to recruit the right people, devoted to upholding the values of honor, courage, and commitment.

The Marine Corps is focused on developing and retaining Marines with the right skills for future challenges. This strategy supports the sustainment of a more experienced, better trained, and more capable force. The Marine Corps has re-scoped its force structure to the capabilities necessary to be appropriately manned, trained, and equipped as a Naval Expeditionary Force-in-Readiness that is prepared to operate inside actively contested maritime spaces in support of Fleet operations.

Reserve Component

The FY24 President's Budget request supports a Marine Corps Reserve Component end strength of 33,600. The Marine Corps Reserve maintains a "Relevant-Ready-Responsive" force capable of seamlessly operating as a part of the Total Force to fulfill CCMD and Service rotational and emergent requirements. The reserves support each CCMD by providing forces capable of regional security cooperation, crisis response and prevention activities, and major combat operations. The Marine Corps Reserve maintains a robust operational tempo while providing critical capabilities essential in sustaining lasting national security at the strategic level. Global deployments, along with participation in Service-level, joint, and multilateral exercises, develop the depth of experience necessary to ensure the Marine Corps Reserve is relevant and ready to meet the CCMD needs for highly trained, experienced, and motivated general-purpose forces. The budget provides pay and allowances for drilling reservists, personnel in the training pipeline, and full-time active reserve personnel. Additional expenditures are targeting retention and recruiting initiatives to attract and retain reserve component Marines as the Service seeks to recover its reserve strength numbers.

The Marine Corps Reserve provides both strategic and operational depth to the Active component and it is an integral part of the Marine Corps Total Force. Marine reservists serve with Special Purpose Marine Air Ground Task Forces, as individual augments, and as trainers and advisers with security force assistance teams in direct support of combatant commanders' requirements. Consequently, the Reserve force maintains a high level of operational experience as it serves beside its Active Component counterparts.

In FY 2020-2021 the Service mitigated pandemic-related limits to initial training throughput by reducing Reserve Component accessions in favor of the Active Component. Additionally, increased attrition correlated with the COVID-19 vaccination requirements have impacted Marine Corps Selected Reserve strength levels. The Service anticipates that a period of several years will be required to rebuild the Selected Reserve to pre-pandemic end-strength.

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 22,476 | \$2.504 |
| FYDP Year 1 (FY 2024): | 22,188 | \$2.536 |
| FYDP Year 2 (FY 2025): | 22,345 | \$2.593 |
| FYDP Year 3 (FY 2026): | 22,214 | \$2.639 |
| FYDP Year 4 (FY 2027): | 21,178 | \$2.568 |
| FYDP Year 5 (FY 2028): | 21,228 | \$2.631 |

The DON mission to recruit, train, equip and organize requires Total Force Management a mix of Sailors, Marines, civilians, and industry partners necessary to provide the Navy the Nation Needs.

The Marine Corps utilized Strategic Workforce Planning to conduct an analysis of organizational design to determine the assignment of duties to positions in a manner which ensures the mission is legally and properly accomplished while making optimum use of manpower resources and technological advancements to realize efficiencies which resulted in a decrease of Marine Corps civilian personnel.

Force Design divestments were programmed during FY23 based on strategic analysis to restructure and reshape the civilian workforce to achieve enterprise modernization efforts to afford a more lethal and resilient Marine Corps. Consequently, these divestments/reductions were programmed across the FYDP to garner savings to be applied to other higher priority force design/modernization areas.

Additionally, the Marine Corps increased its civilian personnel to address sexual assault and sexual harassment in the military and establish strategic direction to implement the approved recommendations from the IRC on Sexual Assault in the Military, in a phased approach. This includes assessment, prevention and response, compliance with existing policy and changes to the military justice process governing the handling of sexual assault and sexual harassment cases, prevention, climate and culture, and victim care and support.

The FY24 President's Budget maintains our commitment to force design and development. Personnel will provide protection, safety and security for Marines and their families at Marine Corps bases and stations throughout the world.

Conclusion

The Marine Corps' highest priority and primary objective is recruiting, developing, and retaining elite warriors in the highest state of combat readiness to support and defend our great nation. Every recruiting, retention, and talent management initiative that the Marine Corps undertakes must demonstrably or logically contribute to this objective and enable the capabilities and capacities of Force Design to be realized. The Marine Corps must continue to recruit the best of our Nation's youth to serve and must do so in an environment that has shown shrinking propensity and eligibility to serve, industrial age limitations on recruiter outreach, and rapidly rising costs of advertising our message of honor, courage, and commitment.

The ongoing efforts to modernize through Force Design 2030 and Talent Management 2030 will ensure the Marine Corps' ability to meet the statutory role and be ready to respond to crises – across the Range of Military Operations – from active campaigning to conflict. The current modernization efforts will enable the Marine Corps to operate, fight, and win in a more diverse set of scenarios and geographic regions than we can today. Marines are, and will remain, "most ready when the Nation is least ready" – a force in readiness prepared to respond to any crisis, anywhere, at any time.

Department of the Air Force

Manpower Narrative

Introduction

The Nation's demand for airpower and space dominance requires an agile and lethal force able to adapt rapidly to accomplish a wide variety of missions across all warfighting domains. To achieve this, the Department must leverage the combined strengths of the Active, Guard, Reserve, and civilian forces. The Department of the Air Force (DAF) provides conventional and strategic forces to combatant commanders enabling them to deter and defeat aggression, now and for the foreseeable future. This narrative outlines how the DAF aligns manpower across its two Services, Air Force and Space Force, to support the NDS. Last year, the DAF requested 706,298 total force end strength, to satisfy immediate mission requirements and invest in the future capabilities funded in the FY23 enacted budget. The DAF FY24 request for 701,682 total force end strength represents divesting legacy platforms allowing the DAF to fund necessary critical operational capabilities and functions to terminate or restructure programs with limited utility. These are aggressive, generational changes categorically necessary to secure the Nation's future in this strategically competitive environment. Proposed reductions in FY24 are commensurate with proposed force structure and divestitures.

For the FY24 budgetary cycle the DAF focused on the seven Operational Imperatives which address critical warfighting capability gaps that are needed to deter and, if necessary, defeat Chinese aggression. Not addressing these gaps today drastically increases the risk to future warfighters. While there is still work to be done, the FY24 President's Budget makes great strides to place the Air Force on a sustainable path toward modernization. The DAF has two options: accept risk in the short term to modernize and strengthen America's defense through legacy platform replacement and funding of future capabilities or cede military capability to our strategic competitors through a business-as-usual approach. The budget is finite: forced funding of outdated systems jeopardizes our ability to guarantee air and space superiority. We must accept the risk that comes with retiring older platforms to onboard new technologies and equipment that will ensure the United States maintains sufficient military advantage to secure our vital national interests.

Time is not on our side as the pacing challenge continues to move forward with an aggressive modernization program. Each day we choose not to invest in the future gives our adversaries a competitive advantage and increases the risk of failure. To meet the threats facing the force of today and in the future, we must orient our decision-making processes and shape future investments around long-range kill chains and the elements that support them. We continue to seek opportunities to divest capabilities, that are not consistent with pacing challenges, and focus on the key capabilities required to execute the NDS. Moving away from these legacy platforms redirects manpower to our newest aircraft/platforms, many of which require both experienced maintainers and experienced pilots to maintain our competitive edge.

The FY24 President's Budget emphasizes investment in...

Operational Imperatives Modernization Munitions Readiness Foundational Accounts Airmen and Personnel Programs

The DAF intends to remain dedicated to looking critically at our investments to ensure our resources are properly aligned to a design/strategy that will deter and, if necessary, defeat our adversaries.

The DAF's seven operational imperatives inform our FY24 President's Budget (PB) manpower investments:

Space Order of Battle – Define the resilient and effective Space Order of Battle and Architectures. Space is a foundational requirement for effective all-domain operations and converging effects on military objectives. We must be equipped and capable of denying a potential adversary's space-based ability to attack our terrestrial assets, especially our high-value power projection assets.

Operationally Focused Air Battle Management Systems (ABMS) – Future warfare requires operationally optimized ABMS and Air Force Joint All-Domain Command & Control that are resilient, operationally relevant and enabling for future conflicts.

Tactical Air Dominance – Define the Next Generation Air Dominance (NGAD) System-of-Systems to ensure the Air and Space Forces generate sufficient combat power to blunt a peer enemy's attack. Maintaining bomber, fighter, and tanker capacity is critical to supporting the NDS as well as creating new capabilities such as the NGAD, which will link current and future capabilities to ensure seamless support to the joint force and commanders on the ground.

Moving target engagement – Achieve the Moving Target Engagement at Scale in a challenging operational environment. The joint force must be able to leverage capabilities, such as next-generation sensors and decision support provided by our ABMS investments, to acquire and, if necessary, prosecute targets, prioritizing those that would deny our access to an area of operations.

Resilient Basing – Define optimized resilient basing, sustainment, and communications in a contested environment for a mix of investments in resilient forward basing for current and planned tactical aircraft. Agile Combat Employment is a strong step in the right direction.

Global Strike – Define the B-21 Long Range Strike Family-of-Systems to supplement current and next-generation, crewed platforms with lower cost complimentary uncrewed systems. The technologies are available now to introduce uncrewed aircraft in the system-of-systems context, both at the tactical level with NGAD and at the more strategic level with the B-21.

Readiness to Deploy and Fight – Be ready to transition to a wartime posture against a peer competitor at a moment's notice to ensure the entire system is hardened against the threats we would expect an enemy to present, so we can meet our commitments to combatant commanders.

United States Air Force

The U.S. Air Force (USAF) no longer enjoys global primacy in its core missions:

(1) Air superiority

- (2) Global intelligence, surveillance, and reconnaissance (ISR)
- (3) Rapid global mobility
- (4) Global strike
- (5) Command and control (C2)

To remain competitive, the USAF needs investments in future capabilities at the scale and scope necessary to ensure warfighting advantage over peer adversaries. The FY24 manpower request allows the USAF to continue to regain readiness for near-term air power availability and drive towards future capability to win the high-end fight.

Strategic Priorities, Goals, and Challenges

The USAF must transform its capabilities, concepts, organization, and Airmen to meet current and future demands to best contribute to the Joint Force and implement the NDS. The USAF must accept risk in programs and capabilities, considering and deliberating expenses in a budget-constrained environment to compete with the People's Republic of China and Russia in the future, and successfully address other emergent challenges. All parts of the enterprise must support force-structure decisions and amend force-planning processes to create the fiscal flexibility to design and field the Air Force the Nation Needs while managing operational risk over time.

In the FY24 budget, manpower investments were driven by five strategic resourcing decisions to get the USAF the necessary future capability.

Global Strike: Nuclear Modernization continues to be the USAF's number one priority, which includes significant investment in Ground Based Strategic Deterrence, Bomber Recapitalization, and Long-Range Standoff.

Air Superiority: The Service will modernize the fighter force and field the right mix of capability and capacity by transforming from seven fighter Mission Design Series to four over the next two decades while also investing in unmanned wingmen.

C2/ISR: Develop/invest in bridging capability to modernize Air/Ground Moving Target Indicator mission sets, continue ABMS maturation and development, and continue funding and constructing the critical technologies and architectures required to make it a reality.

Rapid Global Mobility: The Service focuses on right sizing the airlift and tanker fleets while ensuring fleet viability into the 2030s.

Foundational: Prioritize demolition to reduce facility footprint, seek out basing options to align our forces correctly against the current/future threats and exploit access to training ranges, and pursue critical enterprise information technology upgrades to support ABMS dependencies. These strategic resourcing decisions come with funding, training, and force management challenges. Fiscal constraints necessitate a lower end strength. Keeping end strength tied to affordable force structure readily available for employment is key to avoiding arbitrary reductions to stay within Total Obligation Authority constraints.

Key Workforce Issues

The USAF FY24 budget request prioritizes improving our posture against the pacing threat, China, by acquiring capabilities that will improve the USAF's current position. Divesting and terminating programs not fully aligned with the NDS is necessary to fund accelerated change in critical operational capabilities and functions to protect the United States' ability to deter conflict and project power against pacing challenges. This requires the USAF to make tough decisions on the force structure needed to win the high-end fight.

The experienced Airmen needed are currently maintaining legacy platforms. The FY23 NDAA continues to prohibit planned legacy force reductions, as well as requires the USAF to provide additional information before executing the divestures. The FY24 PB assumes the USAF can reduce legacy force capacity and increase investments in future capacity. The speed at which the USAF can achieve smaller legacy capacity will determine the speed the USAF can invest manpower in future capabilities.

Active USAF end strength decreased in FY24 by 664 to 324,700 commensurate with force structure divestitures (Airborne Warning and Control System, Joint Surveillance and Target Attack Radar System) and transfer of institutional requirements from the USAF to the USSF (such as instructors and student man years).

Air Force Reserve end strength decreased by 400 to 69,600 in FY24 primarily due to a reduction of 380 end strength at McGuire AFB due to the KC-46 Classic Association Transfer to the Air National Guard (ANG).

The ANG FY24 workforce remained consistent at 108,400 military end strength with no change from FY23 and 16,195 civilian end strength (includes military technicians). For FY24, ANG Military Technicians represent 15% of the full-time ANG workforce and are critical to the overall readiness of the ANG.

Air Force civilian FTEs will increase by 2,072 from 175,757 to 177,829 between FY23 and FY24. The civilian end strength increases are primarily due to adjustments in the Working Capital Fund (WCF) and Active Guard/Reserve military conversions back to Air National Guard Technicians.

Civilian Full Time Equivalent – Air Force

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 175,757 | \$19,217 |
| FYDP Year 1 (FY 2024): | 177,829 | \$20,737 |
| FYDP Year 2 (FY 2025): | 177,349 | \$20,892 |
| FYDP Year 3 (FY 2026): | 177,345 | \$21,487 |
| FYDP Year 4 (FY 2027): | 177,499 | \$21,956 |
| FYDP Year 5 (FY 2028): | 177,559 | \$22,885 |

Conclusion

The positive gains the USAF is making in readiness and investments in future capabilities depend on a steady and predictable budget. The FY24 PB allows the Department of the Air Force to divest outdated legacy aircraft to invest in both near-term availability and future capability to win the high-end fight. This increases the readiness and lethality of the DAF we have and puts us in a position to move toward the USAF and U.S. Space Force the nation needs to meet the NDS.

United States Space Force

The Space Force is a small but agile force called to organize, train, equip, and present forces capable of preserving America's freedom of action in space; enabling Joint Force lethality and effectiveness; and providing independent options – in, from, and to space. Space Force forces support eight Space Operations and Associated Missions: Space Electromagnetic Warfare, Spacelift/Access & Acquisitions, Satellite Communications, Intelligence, Surveillance, and Reconnaissance, Satellite Operations and Engineering, Cyber Operations, Missile Warning/Defense, and Space Domain Awareness.

Strategic Priorities, Goals and Challenges

The Space Force is acquiring new space systems to counter advancing capabilities of China and Russia. Therefore, to support United States national security policies, Space Force workforce planning must include the ability to operate both current and next-generation space systems to prevent losses in capability and capacity. Accordingly, to ensure an optimal mix of personnel experience, the Space Force plans to access lateral entry and inter-Service transfers.

Key Workforce Issues

The Space Force has requested a strength of 9,400 for FY24, an 800 increase from FY23 enacted level. This increase includes 748 (with mission transfer) from the USAF for common institutional requirements (instructors and student man years) and the Army with Space Force acceptance of the Army's Joint Tactical Ground Station mission. The remaining 52 strength increase is to expand partnerships with other national security entities to improve the Nation's space enterprise capability, capacity, and resilience.

For decades, space remained largely the purview of a handful of countries and mostly free from threats. However, many countries now have satellites and private companies offer satellitebased services. Detection, tracking, and defense abilities are of greater demand than ever. These greater demands drive the need for more space capability and capacity and to grow more personnel with space competencies. This requires the Space Force to operate in a unique and dynamic personnel environment, seeking to increase strength while all services deal with an uncertain recruiting future. service familiarity, propensity to serve and eligibility to serve continue to decline and drops in unemployment rates all contribute to the current recruiting challenges. Like commercial space entities, the core functions of the Space Force are Science, Technology, Engineering, Mathematics (STEM)-centered--Acquisition, Cyber/information technology, Engineering, Intelligence, Space Operations. These occupations are all highly competitive and facing critical shortages nationwide. Of the Space Force's requested 14,455-person workforce, 39% need to possess a STEM degree—35% of the military and 46% of the civilians.

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 4,866 | \$651 |
| FYDP Year 1 (FY 2024): | 5,055 | \$745 |
| FYDP Year 2 (FY 2025): | 5,108 | \$780 |
| FYDP Year 3 (FY 2026): | 5,118 | \$800 |
| FYDP Year 4 (FY 2027): | 5,131 | \$821 |
| FYDP Year 5 (FY 2028): | 5,131 | \$837 |

The civilian workforce plays a critical role in executing the Space Force's core space functions. Civilians represented about 32% of the space elements and personnel that transferred to the Space Force through FY22. The FY24 budget request adds 189 civilians in FY24, 53 in FY25, 10 in FY26, and 13 in FY27. This will increase the proportion of the civilian workforce to 35% of the total Space Force. The Space Force will continue to assess military and civilian employment trends and competencies to determine the optimal workforce mix for near and long-term options.

Conclusion

The Space Force seeks a government workforce of 14,455 for FY24 to evolve and expand on the elements transferred from the Army, Navy, Marine, and Air Force. The projected size of the workforce is necessary to preserve United States freedom of action in an increasingly contested space domain. The size of the civilian workforce compared to the military workforce may increase given the uncertain future—military familiarity, propensity, and eligibility continue to decline, and the labor market remains volatile.

Defense Acquisition University (DAU) Manpower Narrative

Introduction

The Defense Acquisition University (DAU) (http://www.dau.edu) is the Congressionally mandated acquisition training organization of the DoD, Office of the Under Secretary of Defense for Acquisition and Sustainment (OUSD(A&S)). DAU's mission is to provide a global learning environment to develop qualified acquisition professionals who deliver and sustain effective and affordable warfighting capabilities. DAU's vision is to produce an accomplished and adaptive workforce, giving the warfighter a decisive edge.

Additionally, DAU performs research, develops professional publications, offers symposia and frequent topical webinars, and consults in subjects related to the acquisition functional areas. The FY24 budget request includes funding for 572 civilian FTEs and operational support to 43 military faculty assigned to DAU.

Key Workforce Issues

DAU provides talent development and career-long professional learning for approximately 158,000 Defense Acquisition Workforce (DAW) members, other DoD professionals, federal civilian agencies, and industry partners to develop, field, and sustain warfighting capability. DAU's products and services target workplace performance and professionalism, while promoting organizational mission effectiveness.

In FY24, DAU will continue to focus on providing acquisition training at the time of need through self-directed learning, the heart of which will be the DAU Credential Program as part of the modernization effort. Credentials are packages of learning that give workforce members the skills and knowledge needed to make informed acquisition decisions in an organized and trackable way. These curated bundles of formal and informal learning activities build on the foundation of core certification and allow the DAW to obtain the knowledge and skills needed for successful acquisition outcomes.

Credentials have an important role in DAU's modernization. Self-directed learning opportunities with DAU are expanding rapidly to include learning experiences, webinars, and on-the-job tools.

Civilian:

| | Current/Project Size | Associated Cost |
|------------------------|----------------------|-----------------|
| Current Year (FY 2023) | 570 | \$118.5 |
| FYDP Year 1 (FY 2024): | 572 | \$125.4 |
| FYDP Year 2 (FY 2025): | 572 | \$129.0 |
| FYDP Year 3 (FY 2026): | 572 | \$131.7 |
| FYDP Year 4 (FY 2027): | 572 | \$134.5 |
| FYDP Year 5 (FY 2028): | 572 | \$137.3 |

Projected Size and Associated Cost (\$ in Millions)

Conclusion

DAU's operating budget and personnel strength levels are prioritized to develop and deliver world class content, in a frictionless manner, reducing the time between the problem and the solution, and to ensure the Department can deploy essential information and knowledge at scale. DAU's investments in learning assets, infrastructure, and information technology will ensure DAU remains a valued, trusted partner to the entire acquisition community.

Defense Advanced Research Projects Agency (DARPA) Manpower Narrative

Introduction

DARPA serves as the research and development organization within the DoD with the primary responsibility of maintaining U.S. technological superiority over our adversaries. With a lean technical and support staff, DARPA pursues imaginative and innovative research and development programs with the potential for significant impact on future national security.

The FY99 NDAA provided experimental use of special personnel management authority to facilitate recruitment of eminent experts in science or engineering from industry to manage research and development projects administered by DARPA. Since its inception, DARPA has continued to use this authority to hire subject matter experts in various scientific fields to fill key program management positions within the Agency. Under this authority, program managers are hired as term employees, and typically serve four to six years at DARPA. Over time, Congress has fully recognized the significant benefits this authority has had in allowing the Agency to fulfill its mission by increasing the number of full-time equivalents permitted under the authority, and made the authority permanent in the FY17 NDAA.

DARPA's FY24 manpower budget reflects 15 military, 238 civilians and 800 contractors.

Key Workforce Issues

Civilian:

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 199 | \$54.7 |
| FYDP Year 1 (FY 2024): | 238 | \$65.8 |
| FYDP Year 2 (FY 2025): | 246 | \$69.0 |
| FYDP Year 3 (FY 2026): | 246 | \$70.5 |
| FYDP Year 4 (FY 2027): | 246 | \$72.0 |
| FYDP Year 5 (FY 2028): | 246 | \$73.5 |

Projected Size and Associated Cost (\$ in Millions):

The total civilian personnel budget includes both Management Headquarters Activity personnel and Mission Support personnel. The current civilian personnel projected size reflects budgeted vice authorized manpower requirements and reflects an increase in FTE in FY23. This includes additional personnel for the FY23 stand-alone audit, as well as, continued support of expanded program scope in microelectronics, quantum, biotechnology, and artificial intelligence initiatives. In addition, there have been no offsetting reductions or transfers of functions between military, civilian and contractor employees.

Conclusion

The FY24 budget request supports total civilian personnel FTEs of 238 to meet DARPA's current mission requirements, which includes an appropriate balance of support personnel and technical experts.

Defense Commisary Agency (DeCA) Manpower Narrative

Introduction

MISSION STATEMENT: Deliver a vital benefit of the military compensation package that improves quality of life and readiness by providing grocery items at significant savings.

VALUES: We have P.A.S.S.I.O.N. for what we do...

- We PURSUE excellence through continuous improvements
- We are ACCOUNTABLE to our patrons and our workforce
- We demonstrate a SPIRIT of commitment and urgency
- We maintain relevant and high STANDARDS
- We INSTILL trust and confidence
- We take OWNERSHIP of our performance and behavior
- We are NECESSARY to improve quality of life for the military family ... as we deliver the benefit!

VISION: To be THE grocery provider of choice for our eligible patrons – delivering a vital benefit exclusively for our military community and their families

DeCA relies almost exclusively on civilian manpower to accomplish its mission. During FY22 we executed 12,798 civilian FTEs. We also executed 4 military Warrant Officer manpower assignments. In addition, we rely on a contracted workforce to perform our shelf stocking activities in the stores and custodial functions in the stores. The number of contracted manpower equivalents (CMEs) consumed in FY22 is estimated at 2500 CMEs. We have continued to maintain a full-service profile in our delivery of customers service benefits and accumulated 4.2 billion dollars in sales for FY22.

Strategic Priorities, Goals and Challenges

LINES OF EFFORT:

LOE 1.0: Supply Chain: Future State: Our supply chain is transformed and enables full commissary shelves with the right products delivered at the right time and place at the lowest cost. Strategic Outcome: Full Shelves

LOE 2.0: Omni-Channel: Future State: Our Patrons are provided a superior Omni-Channel shopping capability enabled by our digital shelf, online payment, and delivery. Strategic Outcome: Increased Convenience and Access to the Benefit

LOE 3.0: Customer Service: Future State: We have earned and maintain the confidence of our Patrons that we will deliver their exclusive benefit in a safe, clean, convenient, and exciting way as "their grocery provider of choice." Strategic Outcome: Premier Customer Experience

LOE 4.0: Demand Creation: Future State: We are delivering more benefit to more patrons and exceeding our savings and revenue goals. Strategic Outcome: Patron Savings and Increased Revenue

LOE 5.0: Facilities Modernization and Readiness: Future State: All stores are comfortable, inviting, well-lit and maintained, with functional equipment, up-to-date décor packages, and information technology enabled amenities. Strategic Outcome: Modern, well-maintained Stores

LOE 6.0: Workforce Investment: Future State: We are an engaged, talent-rich and customerfocused organization encompassing trust, respect, and ownership among DeCA's leaders and employees. Strategic Outcome: A Talented and Motivated Customer-Focused Workforce LOE 7.0: Winning on Fresh: Future State: We provide the right assortment of fresh products at the right price and quality that exceeds our Patron's expectations. Strategic Outcome: High Quality and Fresh Products at the Right Price

LOE 8.0: Data and Analysis: Future State: All Agency decisions are enabled by clear, timely, and accurate data, state-of-the-art decision support tools, and big data analytics. Strategic Outcome: Fully Informed and Accurate Decision Making

Key Workforce Issues

As with most commercially operated grocery chains, our service levels are driven primarily with the civilian workforce, which is about eighty-three percent of our total labor, with the remaining seventeen percent is dedicated to a contracted workforce that performs night-stocking functions and custodial support. Our reliance on military personnel to support operations is minimal (less than one percent).

While labor markets continue to provide needed store level manpower to get the job done, DeCA's ability to retain needed civilian and contractor support is being taxed by competition in salaries and benefits. DeCA's business relies heavily on DoD civilian support (12,798 FTEs in FY22 costing \$796.5M) while having minimal military manpower (4 FTEs) assigned.

DeCA, like many other government activities this year, continues to face significant risks from competition in the private sector for critical workforce talent. This is particularly true in the disciplines of information technology, acquisition, and financial management.

*Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 12,612 | \$858.964 |
| FYDP Year 1 (FY 2024): | 12,615 | \$905.243 |
| FYDP Year 2 (FY 2025): | 12,615 | \$926.074 |
| FYDP Year 3 (FY 2026): | 12,615 | \$941.062 |
| FYDP Year 4 (FY 2027): | 12,615 | \$955.109 |
| FYDP Year 5 (FY 2028): | 12,615 | \$969.301 |

There were no transfers of functions between our military, civilian and/or contracted workforce during this reporting period.

Conclusion

DeCA remains poised to meet the challenges of delivering a 21st century commissary benefit by transforming and developing our workforce to meet and strengthen our data-based decision-making methodologies. We also are striving to cultivate an Agency-wide environment that seeks to develop and evaluate operational cost reductions. Our primary goal throughout the commissary system is to continue to be good stewards of the resources we are given.

| | | | | | | | | | |

Defence Contract Audit Agency (DCAA) Manpower Narrative

Introduction

The DCAA provides audit and financial advisory services to the DoD and other federal entities responsible for acquisition and contract administration. The DCAA's role in the financial oversight of government contracts is critical to ensure DoD gets the best value for every dollar spent on defense contracting. The DCAA operates under the authority, direction, and control of the Under Secretary of Defense (Comptroller)/Chief Financial Officer, and its work benefits the men and women in uniform and the American taxpayer.

The DCAA auditors examine contractor accounts, records, and business systems to evaluate whether contractor business practices and procedures are in compliance with the FAR, the Defense Federal Acquisition Regulation Supplement, Cost Accounting Standards, and other applicable government laws and regulations. The DCAA has no direct role in determining which companies are awarded defense contracts; rather, it provides recommendations to government officials on contractor cost assertions regarding specific products and services. With these recommendations, contracting officers are better able to negotiate prices and settle contracts for major weapons systems, services, and supplies. Out of a population of approximately 7,000 active contractors, the DCAA engages with over 4,600 contractors in a typical year, examining more than \$260 billion in contract costs, and issuing about 2,560 audit reports.

As a key defense acquisition organization, the DCAA is chartered with the responsibility of providing a wide range of audit and financial advisory services supporting the negotiation, administration, and settlement of contracts for Government contracting officers. By virtue of this mission, the DCAA must retain a cadre of trained, highly competent and professional employees. In a typical year, labor and related fringe benefits account for approximately 86 percent of the DCAA's budget. Statutory and regulatory requirements, designed to ensure that the Government meets its fiduciary responsibilities to the public, drive the majority of the DCAA's workload. In this capacity, the DCAA supports the oversight and internal control responsibilities of the OSD, the DoD IG, the GAO, and the Congress.

The DCAA's workload and associated staffing levels follow the DoD procurement funding levels. The workforce is comprised of 3,941 civilians and 118 contractors.

Key Workforce Issues

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 3,941 | \$573.7 |
| FYDP Year 1 (FY 2024): | 3,940 | \$592.5 |
| FYDP Year 2 (FY 2025): | 3,940 | \$601.2 |
| FYDP Year 3 (FY 2026): | 3,940 | \$605.5 |
| FYDP Year 4 (FY 2027): | 3,940 | \$609.6 |
| FYDP Year 5 (FY 2028): | 3,940 | \$616.9 |

The DCAA will realign 1 civilian FTE to Cyber to support DCAA mission cloud cybersecurity network defense in FY24. The realignment will continue to enable the DCAA workforce to effectively address the Department's most critical contract audit areas, including business systems, truth in negotiations, and investigative support for the Department civil and criminal investigators and attorneys. In FY22, the DCAA audit findings enabled Contracting Officers to negotiate fair and reasonable contract prices and saved \$3 billion for the Department. Without this level of support, the Services will experience an increase in costs associated with their defense contracting efforts.

Conclusion

The FY24 budget request supports staffing levels to execute DCAA's mission of delivering high quality contract audits and services to ensure that warfighters get what they need at fair and reasonable prices for goods and services.

The DCAA continues to return savings to the Government that far exceed the cost of its operations. In FY22, the Agency audited approximately \$262.3 billion of costs incurred on contracts and issued 486 forward pricing proposal audit reports covering over \$48 billion in proposed contract costs. The DCAA also recognized \$3 billion in net savings as a result of reported audit findings. The return on taxpayers' investment is approximately \$4.60 for every dollar invested in the Agency (\$647.9 million in FY22, including reimbursable funding).

Defense Contract Management Agency (DCMA) Manpower Narrative

Introduction

The DCMA mission is to perform Contract Administration Services (CAS) and Contingency Contract Administration Services (CCAS) for the DoD, other Federal Agencies, foreign governments, international organizations, and others as authorized. The DCMA directly manages industrial performance of predominately all DoD Weapon Systems, Combat Platform production and depot maintenance work (excluding shipbuilding, facilities management, consumables and low risk parts production and delivery). The DCMA is a Defense Agency under the authority of the Under Secretary of Defense for Acquisition and Sustainment as the Principal Staff Assistant.

The DCMA directly supports the NDS priorities, to enable the Department to remain the world's preeminent fighting force. The DCMA mission and responsibilities clearly align with the Defense priorities: (1) Defending the homeland, paced to the growing multi-domain threat posed by the People's Republic of China (PRC); (2) Deterring strategic attacks against the United States, Allies, and partners; (3) Deterring aggression, while being prepared to prevail in conflict when necessary, prioritizing the PRC challenge in the Indo-Pacific, then the Russia challenge in Europe; and (4) Building a resilient Joint Force and defense ecosystem.

Manpower is DCMA's primary asset for accomplishing its mission and is the predominant use for its appropriated funds. The Agency's civilian and military personnel (10,203 and 705, respectively) are located in over 1,000 locations across the globe, administering contract life-cycle management of approximately 229,000 active contracts totaling \$3.72 trillion, of which the Services have obligated \$2.3 trillion; \$332.7 billion remains to be disbursed. The DCMA contract management workload generates revenue for the Department and the taxpayer by means of cost savings and avoidance in excess of the current DCMA annual budget authority. The CAS and CCAS workload performed by the DCMA workforce enables the Services to increase the on-time delivery of the procurement of essential mission critical warfighting equipment at reduced cost.

Key Workforce Issues:

Civilian:

Current/Project Size **Associated Cost** Current Year (FY 2023): D: \$1,289.0 R: \$226.0 10,181 FYDP Year 1 (FY 2024): 10,203 D: \$1,358.8 R: \$230.1 FYDP Year 2 (FY 2025): 10,151 D: \$1,389.6 R: \$236.7 FYDP Year 3 (FY 2026): 10,023 D: \$1,397.5 R: \$241.7 FYDP Year 4 (FY 2027): 9,919 D: \$1,409.1 R: \$246.8 FYDP Year 5 (FY 2028): 9,917 D: \$1,438.6 R: \$252.0

Projected Size and Associated Cost (\$ in Millions):

The DCMA workforce is the agency's most valuable asset to accomplish the mission. Personnel Compensation and Benefits account for around 85% of the DCMA Operation & Maintenance appropriated budget authority. The DCMA will continue to assess the workforce and workload requirements to align with the NDS, and ensure high caliber employees are recruited and retained. As a predominantly manpower resourced organization, the DCMA performs continuous monitoring of labor execution, while remaining keenly aware of the impact routine labor adjustments has on the agency's bottom line execution. For example, changes in areas such as performance compensation strategies, federal pay increases, general schedule step increases, and employee retirement allocations can adversely impact the agency's ability to sustain a consistent knowledgeable workforce and maintain an optimal resource ratio of labor to non-labor. To make informed data driven resourcing decisions, the DCMA has invested in an initiative to model Operational Unit (OU) workload, and utilize model output to inform the alignment of OU workforce with workload requirements. This progressively evolving approach is instrumental to improving the DCMA allocation and alignment of resources.

DCMA executed a transfer of 10 FTEs starting in FY24 to the Army for the Joint Systems Manufacturing Center for Installation Management functions. The DCMA civilian workforce projections slightly increase in FY24 and then continues to decrease from FY25-28. Overall, the DCMA workforce profile has decreased from last year's FYDP position. The DCMA budget priorities are to implement DoD directives to optimize the agency's value to Service customers and the DoD; increase efficiencies through streamlined processes; invest strategically in nonlabor projects to maximize potential returns on investment; and modernize legacy information technology systems. Therefore, the DCMA budget must reflect a carefully balanced mix of resources between civilian personnel and non-labor requirements to ensure the mission can be successfully accomplished at an acceptable level of risk.

Conclusion

The DCMA directly supports the National Defense priorities, in order to enable the Department to remain the world's preeminent fighting force. The DCMA will continue to explore strategic reform initiatives to provide quality contract administration services, facilitate the delivery of critical DoD emerging needs, execute its cybersecurity mission, and support/implement current and future leadership strategic areas of focus. DCMA will continue to assess its manpower to ensure adherence to the NDS while continuing to retain, recruit and attract a high caliber workforce.

Defense Counterintelligence and Security Agency (DCSA) Manpower Narrative

Introduction

On behalf of the Secretary of Defense, DCSA serves as the primary Federal entity for personnel vetting (background investigations and continuous vetting) to ensure an effective, efficient, and trusted workforce for the Federal Government as directed in the Executive Order 13869, as well as the continuation of the National Industrial Security Program (NISP) mission. The DCSA was formed over the course of 2019 to 2021 through the merger of missions and functional areas from seven distinct organizations to better accomplish the nation's security missions. This integration is foundational to building the best possible security enterprise to defend the United States from extant and future adversaries attempting to gain a national security advantage through our workforce, technologies, and supply chain. The consolidated missions include the realignment of 5,000 federal employees, several thousand contractors, 167 field offices comprising over 1.1 million square feet of physical space, 38 information technology systems, over \$1 billion in appropriated funds, and over \$1.3 billion in WCF. Since the formal establishment of the agency, DCSA has restructured its organization to realign personnel previously assigned to the disestablished Defense Vetting Directorate to better support and align with the NDS by ensuring a trusted federal, industrial and affiliated workforce through continuous vetting and insider threat programs. These programs enable government and industry to deliver uncompromised capabilities to the warfighter by utilizing artificial intelligence, machine learning and cutting edge technologies and innovation. The blending of the operational missions of Industrial Security, Personnel Vetting, Counterintelligence, Insider Threat, and professional education and certification provides the DCSA with the unique advantage in preserving the nation's strategic edge. The DCSA ensures that sensitive and classified U.S. and foreign government information, technologies, and material entrusted to cleared industry is securely protected. The DCSA headquartered in Quantico, Virginia, with the 167 field offices located across the U.S. executes NISP oversight for DoD and 33 other Federal executive branch agencies, determines security eligibility for all non-Intelligence DoD personnel and conducts personnel vetting for more than 100 federal agencies. As the Industrial Security functional manager for the DoD, DCSA provides security education, training, certification, and professional development for DoD and other U.S. Government personnel contractor employees, and U.S. foreign government partners. The DCSA conducts required NISP assessments to deter, detect, and identify loss or compromise of classified information and ensure corrective actions are taken to prevent recurrence.

Key Workforce Issues:

Civilian:

Appropriated Funded Manpower - (Projected Size and Associated Cost (\$ in Millions):

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 2,006 | \$310.6 |
| FYDP Year 1 (FY 2024): | 2,022 | \$343.5 |
| FYDP Year 2 (FY 2025): | 2,067 | \$359.9 |
| FYDP Year 3 (FY 2026): | 2,121 | \$371.1 |
| FYDP Year 4 (FY 2027): | 2,102 | \$378.0 |
| FYDP Year 5 (FY 2028): | 2,102 | \$385.5 |

WCF Funded Manpower - (Projected Size and Associated Cost (\$ in Millions):

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 3,315 | \$417.0 |
| FYDP Year 1 (FY 2024): | 3,500 | \$503.1 |

The DCSA FY24 appropriated funded workforce is comprised of 2,022 civilian FTEs and 312 contractor support personnel in multiple locations across the U.S. DCSA maximizes workforce investments to address increased threats in technology, science, and the globalization of business and the American workforce through an intelligence led, asset focused and threat driven security oversight methodology. During FY24 the DCSA Industrial Security mission is expanding to address Foreign Ownership, Control, or Influence (requirements established in section 847 of the FY20 NDAA. Section 847 requires DCSA to review, mitigate and monitor contractor firms in the Defense Industrial Base (comprised of more than 100,000 contractor firms) bidding on DoD contracts greater than \$3 million for other than supply items.

The DCSA FY24 WCF funded workforce is comprised of 3,500 civilian FTEs to support the Background Investigation and Continuous Vetting (CV) missions as the investigative service provider for the majority of the federal government, to ensure the trustworthiness and integrity of the federal and contract workforce government-wide, as well as members of the military, by performing national security and suitability investigations. In the above DCSA WCF FTE profile, the increase from FY23 to FY24 is due to the CV, National Background Investigative Services, and Expedited Screening Center missions transferring to the DCSA WCF starting in FY24.

Conclusion

DCSA is committed to ensuring its resources are aligned to support evolving mission growth and priorities, to reduce cost where prudent, streamline operations and maximize efficiencies where possible.

Defense Finance and Accounting Service (DFAS) Manpower Narrative

Introduction

As one of the world's largest finance and accounting operations, DFAS builds on its core values of Integrity, Service, and Innovation to lead the DoD in finance and accounting by ensuring the delivery of efficient, exceptional quality pay and financial information.

Established to leverage economies of scale and scope by centralizing various finance, accounting, human resources, and financial systems management services, the DFAS effectively employs data transparency and customer collaboration to steadily and continually drive efficiencies. Since its inception, the DFAS has consolidated more than 300 installation-level offices into ten sites and reduced the number of systems in use from more than 300 to 74.

The DFAS provides a diverse range of accounting and financial reporting services to the DoD Military Services and Defense Agencies. This includes providing pay services in support of DoD civilian and military personnel, military retirees and annuitants, as well as major DoD contractors and vendors. The DFAS also functions as a shared services provider, delivering services to some federal customers outside the DoD.

The DFAS workforce consists of military members, government civilians, foreign national civilians, and contractor personnel. This workforce mix operates at ten locations throughout the United States and abroad, including Indianapolis, IN; Bratenahl, OH; Cleveland, OH; Columbus, OH; Rome, NY; Limestone, ME; Alexandria, VA; Texarkana, TX; Japan; and Germany. The military manpower footprint for DFAS is less than one half of one percent of the DFAS total force mix.

Key Workforce Issues

The DFAS civilian workforce, as reflected in the Comptroller Information System for the FY24 President's Budget, is detailed below and includes 200 Foreign National Indirect Hires. It excludes NAF employees funded through other resources.

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Prior Year (FY 2022): | 10,697 | \$767.90 |
| Current Year (FY 2023): | 10,889 | \$816.42 |
| FYDP Year 1 (FY 2024): | 10,830 | \$864.59 |
| FYDP Year 2 (FY 2025): | 10,787 | \$878.59 |
| FYDP Year 3 (FY 2026): | 10,747 | \$893.61 |
| FYDP Year 4 (FY 2027): | 10,750 | \$912.18 |
| FYDP Year 5 (FY 2028): | 10,757 | \$931.38 |

Projected Size and Associated Cost (\$ in millions):

Financed as a 100 percent WCF, DFAS obtains revenue by charging customers for the services it provides, rather than being funded through direct appropriations, which affects the projected size of the civilian workforce. The size of the DFAS civilian workforce fluctuates based on customer orders and obligation authorities. The agency sets annual rates two years in advance based on customer workload and estimated costs calculated to offset any prior year gains or losses. DFAS collaborates with its' customers in conducting rate and billing analysis to project work counts and manpower requirements.

To ensure that accounting and financial management resources, including manpower, are properly aligned, DFAS focused its most critical requirements on four key strategic priorities (Strengthen Customer Partnerships, Enhance Performance, Modernize the Business Environment, and Invest in People), and by the end of FY26 will have:

- Implemented innovative customer-oriented solutions that improve efficiency and partnership.
- Adopted skill sets and practices to align agency expertise in advisory, finance, and accounting services with the needs of the financial management community.
- Achieved cost, schedule, and performance targets that support delivery of efficient, standardized, and value-added services.
- Reformed processes and systems to strengthen DFAS as a valued and competitive member of the financial management community.

Conclusion

The DFAS manpower position supports achieving the DFAS vision to be a valued partner in financial management by consistently delivering first-class service and products. It also allows DFAS to deliver financial excellence and quality pay services to our customer, as well as take on a collaborative and leadership role in achieving vital Department priorities and initiatives.

Defense Health Program (DHP) Manpower Narrative

Introduction

The DHP enables the Army, Navy, and Air Force Medical Services to provide a medically ready force and ready medical force to CCMD in both peacetime and wartime. The DHP supports the delivery of integrated, affordable, and high-quality health services to Military Health System (MHS) beneficiaries and is responsible for driving greater integration of clinical and business processes across the MHS by:

- Delivering joint functions and capabilities, enabling the rapid adoption of proven practices, reducing unwanted variation, and improving coordination of joint health for the warfighter.
- Ensuring that every Service member is medically ready through the delivery of safe, integrated, patient-centered care.
- Providing opportunities for MHS medical providers to get the readiness training they need by enabling our health delivery platforms to serve as forums to obtain and sustain service medical currency and competency requirements.
- Continuing to implement reforms to the TRICARE health plan with the goal of providing even more integrated, higher-quality care to TRICARE beneficiaries.
- Fully implementing the MHS's new electronic health record, MHS GENESIS, providing enhanced, secure technology that will increase efficiencies for beneficiaries and health care professionals.

Key Workforce Issues

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 57,395 | \$6,622.15 |
| FYDP Year 1 (FY 2024): | 59,925 | \$6,923.78 |
| FYDP Year 2 (FY 2025): | 59,925 | \$7,064.33 |
| FYDP Year 3 (FY 2026): | 59,925 | \$7,212.48 |
| FYDP Year 4 (FY 2027): | 59,925 | \$7,186.64 |
| FYDP Year 5 (FY 2028): | 59,925 | \$7,189.26 |

In cooperation with the Joint Staff Surgeon and Military Department medical organizations, the Defense Health Agency leads the DoD integrated system of readiness and health through a global health care network of military and civilian medical professionals, including more than 400 military hospitals and clinics around the world, to improve and sustain operational medical force readiness and the medical readiness of the Armed Forces. By 2026, DHA will be a joint operational headquarters responsible for managing, executing, and delivering high-quality health care, medical education and training, military medical research and development, and public health in support of over 9.6 million beneficiaries and the Military Departments.

Conclusion

Military Health Program civilians are a critical component of our total force and play an integral role in supporting the mission and daily functions of the MHS. The budget continues to support increasing healthcare efficiencies through a fully integrated healthcare delivery system designed to optimize the delivery of healthcare and to ensure a medical force that is fully prepared for its readiness mission.

DoD Defense Human Resources Activity (DoDHRA) Manpower Narrative

Introduction

The DoDHRA is a Field Activity of the Under Secretary of Defense (Personnel & Readiness), (USD (P&R)) that consists of a headquarters and multiple direct reporting organizations. DoDHRA by design gives USD (P&R) greater capability and flexibility in managing the work of a diverse set of activities supporting the department's human resources mission. Each direct reporting organization within DoDHRA has a unique, but complementary mission set. Headquarters DoDHRA serves as an intermediate headquarters, planning, programming, and budgeting for all activities within the DoDHRA enterprise and in executing, coordinating, and providing direct oversight to the work of its direct reporting organizations. DoDHRA ensures that the Department's warfighters present and past along with their families and civilian members of the Department receive the care and support they deserve, fairly, and in a timely fashion, through benefits administration, program execution and policy enforcement.

The DoDHRA Total Personnel line funds civilian pay and benefits for 1,296 direct civilian FTE and 33 reimbursable civilian FTEs for FY24.

Key Workforce Issues

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 1,328 | \$229.80 |
| FYDP Year 1 (FY 2024): | 1,329 | \$241.64 |
| FYDP Year 2 (FY 2025): | 1,329 | \$248.54 |
| FYDP Year 3 (FY 2026): | 1,330 | \$255.96 |
| FYDP Year 4 (FY 2027): | 1,330 | \$261.31 |
| FYDP Year 5 (FY 2028): | 1,330 | \$266.80 |

Civilian direct FTEs increased by +1 in FY24 to support the IRC on Sexual Assault. Civilian reimbursable FTEs remain unchanged.

Conclusion

DoDHRA continues to internally review and prioritize its posture of manpower resources to ensure the most effective and efficient execution possible without sacrificing valued DoD programs. Addition of 2 FTEs over the FYDP addresses critical issues associated with White House and Department priorities. As DoDHRA encounters emerging missions and requirements, clear and consistent communication occurs at all levels to ensure a full accounting of resources is addressed.

Defense Logistics Agency (DLA) Manpower Narrative

Introduction

DLA's mission is to deliver readiness and lethality to the Warfighter Always and support our Nation through quality, proactive global logistics. As the Nation's Combat Logistics Agency, DLA manages the end-to-end global defense supply chain – from raw materials to end user disposition – for the five Military Services, eleven Combant Commands, other federal, state and local agencies, and partner and allied nations. DLA operates the Supply Chain Management (SCM), Energy and Document Services activity groups. DLA SCM manages the materiel from initial acquisition to storage and distribution, and then finally reutilization or disposal. DLA Energy provides comprehensive worldwide energy solutions for the Military Services and other authorized customers. DLA Document Services provides time sensitive, competitively priced, and highquality printing and digital services. The DLA Strategic Materials' activities included acquisition, storage, disposal, and management of the National Defense Stockpile.

DLA is utilizing workload and workforce re-distribution as well as term employees whenever practical to better respond to workload functions. DLA's civilian workforce requirements overall remain level, although the FY20 transfer of 390 personnel to the Defense Information Systems Agency as part of the Fourth Estate Information Technology Optimization is now planned to take place in late FY23 or early FY24.

The DLA workforce and funding is about 98 percent Defense-wide WCF and 2 percent annual appropriations The following table shows the workforce and funding profile.

| | FY 2022 Actual | FY 2023 Estimate | FY 2024 Estimate |
|--|----------------|------------------|------------------|
| DLA DWCF Supply Chain Management Civ FTE's | 22,449 | 23,849 | 23,416 |
| \$ in Thousands | \$2,706,814 | \$2,951,181 | \$3,049,524 |
| Mil FTE's | 487 | 645 | 644 |
| DLA DWCF Energy Management Civ FTE's | 1,233 | 1,377 | 1,405 |
| \$ in Thousands | \$192,152 | \$251,708 | \$260,793 |
| Mil FTE's | 19 | 22 | 22 |
| DLA DWCF Document Services Civ FTE's | 386 | 417 | 461 |
| \$ in Thousands | \$40,631 | \$43,685 | \$48,743 |
| DLA Strategic Materials Transaction Fund Civ FTE's | 57 | 62 | 65 |
| \$ in Thousands | \$8,652 | \$10,507 | \$10,728 |
| DLA O&M Civ FTE's | 194 | 253 | 247 |
| \$ in Thousands | \$41,761 | \$54,774 | \$35,373 |

| Total Defense Working Capital Fund (DWCF) FTE's | 24,068 | 25,643 | 25,282 |
| Total Defense Working Capital Fund (DWCF) \$ | \$2,939,597 | \$3,246,574 | \$3,359,060 |

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 26,219 | \$3,358 |
| FYDP Year 1 (FY 2024): | 25,852 | \$3,446 |
| FYDP Year 2 (FY 2025): | 25,860 | \$3,485 |
| FYDP Year 3 (FY 2026): | 25,571 | \$3,511 |
| FYDP Year 4 (FY 2027): | 25,464 | \$3,559 |
| FYDP Year 5 (FY 2028): | 25,397 | \$3,622 |

Defense Media Activity (DMA) Manpower Narrative

Introduction

The DMA is a media, training, and education organization that creates and distributes DoD content across a variety of media platforms to audiences around the world. DMA workforce is comprised of 40% civilians, 60% military (95% enlisted and 5% officer), and less than 1% Contractor support onsite. As listed in DoD Directive 5105.74, our 5 mission areas are:

- Provide a wide variety of information products to the entire DoD family (Active, Guard, and Reserve Service members, dependents, retirees, DoD civilians, and contract employees) and external audiences through all available media, including motion and still imagery; print; radio; television; Web and related emerging Internet, mobile, and other communication technologies.
- Communicate messages and themes from senior DoD leaders (Secretary of Defense, Secretaries of the Military Departments, Chairman of the Joint Chiefs of Staff, Service Chiefs of Staff, Combatant Commanders), as well as other leaders in the chain-of-command, in order to support and improve quality of life and morale, promote situational awareness, provide timely and immediate force protection information, and sustain readiness.
- Provide U.S. radio and television news, information, and entertainment programming to Active, Guard, and Reserve Service members, DoD civilian employees and contract personnel, and their families overseas, on board Navy and Coast Guard ships, and other authorized users.
- Provide, throughout the DoD and to the American public, high quality visual information products, including Combat Camera imagery depicting U.S. military activities and operations.
- Provide joint education and training for military and civilian personnel in the public affairs, broadcasting, and visual information career fields to meet DoD-wide entry level skills and long-term career development requirements in the Defense Information School.

Effective March 8, 2023, the DMA Director updated the Operating Instruction 90-01 Organization and Functions. This issuance:

- Updated policy and assigned responsibilities for establishing and making changes to organizational arrangements, functional alignments, and reporting relationships within the DMA.
- Replaced the organizational Lines of Business titles to DMA Components.
- Authorized the publication of the DMA Organization and Functions Manual.
- Disestablished the term Chief Management Officer.

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 516 | \$67.47 |
| FYDP Year 1 (FY 2024): | 516 | \$69.36 |
| FYDP Year 2 (FY 2025): | 516 | \$70.84 |
| FYDP Year 3 (FY 2026): | 516 | \$72.35 |
| FYDP Year 4 (FY 2027): | 516 | \$73.89 |
| FYDP Year 5 (FY 2028): | 516 | \$75.47 |

DMA lost 2 full time equivalent positions due to the AMVID mission transfer to the U.S. Army Military District of Washington. There is no growth anticipated. The calculation of civilian personnel costs was computed using the programmed cost of a GS 12 – Step 5 nationwide salary of \$130,753. The calculation also includes the OSD Inflation Cost Index rates for PB 24 Budget published on 1 February 2022. The 34 Navy Reserve Authorizations have been realigned from DMA to the Department of the Navy. These billets are operationally aligned under Navy CHINFO effective FY24. DMA added one Navy Officer to fill a FY23-25 Chaplain Assignment.

Conclusion

DMA, which includes such iconic outlets as the editorially independent Stars & Stripes and 37 broadcasting facilities abroad, delivers satellite television, radio, internet, multi-media content and services to DoD's more than 3 million military members, reservists, and civilian employees. It also provides education and training for the military public affairs community through the Defense Information School. The U.S. military faces staffing challenges as it seeks to consolidate all its news, entertainment, and command information programs at a time when communication technology is rapidly expanding and evolving.

The DMA mission has grown exponentially while manpower has not increased for decades. The DMA Director is optimistic that multiple media skills training, mentoring at all levels, and rapid advancement will boost retention. A newly added challenge for DMA will be aggregating and administering thousands of Defense Department .mil web sites while also developing video streaming, podcasting, and other rapidly evolving means of communication popular with young Service members. Despite the challenges, DMA is poised to meet its goals and strategic vision.

Department of Defense Dependents Education (DoDDE) Manpower Narrative

Introduction

The DoDDE program includes the Department of Defense Education Activity (DoDEA), Family Assistance (FA), Family Advocacy Program (FAP), Voluntary Education, and Financial Readiness.

DoDEA is a DoD field activity operating under the direction, authority, and control of the USD(P&R) and Assistant Secretary of Defense for Manpower & Reserve Affairs. DoDEA is comprised of the Department of Defense Dependents Schools (DoDDS), the DoD Domestic Dependent Elementary and Secondary Schools (DDESS), the Management Headquarters, and the Consolidated School Support.

The mission of the DoDDS program is to provide a superior educational program that educates, engages, and empowers students to succeed in a dynamic world. In accomplishing its mission, the DoDEA looks to national education initiatives to continually enhance its programs. DoDDS educates students outside the continental United States and has oversight of the DoDEA Virtual High School to offer online courses to meet academic and career-oriented goals. The DoDDS program also provides funds for students enrolled in non-DoD Schools.

The DoDEA Non-DoD Schools program supports the primary and secondary school education of eligible dependents of active-duty U.S. military and DoD civilians assigned to remote, overseas areas where DoDEA schools are unavailable. Eligible dependents of military and civilian sponsors must be included on official orders and meet age requirements. To help defray education expenses for eligible dependents, NDSP assists with funding for tuition and other costs.

Like DoDDS, the DDESS program seeks to provide a world class education to students in military communities in the United States, Guam, and Puerto Rico. In accomplishing its mission, DoDEA looks to national education initiatives to continually enhance its programs. The DDESS program also provides funds for students enrolled in NDSP whose active-duty U.S. military and DoD civilians are assigned in Canada, Mexico, and South America.

The FA program provides programs and outreach services including, but not limited to: the 1-800 Military OneSource call center; the Military and Family Life Counseling Program; financial outreach and non-medical counseling; Spouse Education and Career Opportunities; childcare services; youth programs; morale, welfare, and recreation programs; and support to Guard and Reserve members, their families, and survivors. Funding supports DoD-wide service delivery contracts to support all Active Duty, Guard, and Reserve Components, and is aimed at providing outreach on and off installations with emphasis on geographically dispersed populations. Military OneSource serves as the single DoD point of contact for the collection of personnel accounting information from the DoD Components (DoDI 3001.02, "Personnel Accountability in Conjunction with Natural or Manmade Disasters") and has become the Department's standard for providing 24/7 assistance to military members and their family members around the world.

The FAP funds are sent to each of the Military Services to implement their FAP, ensuring delivery of evidence-based and/or informed-prevention and clinical intervention programs in the areas of domestic abuse, intimate partner violence, child abuse and neglect, and problematic sexual behavior in children and youth. The FAP staff of over 2,000 government and contract personnel executes the FAP within each Military Department down to the installation level. The FAP program includes the New Parent Support home visitation, neglect to parents, screening for at-risk and domestic abuse victim advocates, information about available military and civilian resources, and ongoing victim support, including support in obtaining civilian and military protection orders for current and former spouses and intimate partners. The budget supports the Congressionally-mandated expansion of scope to address problematic sexual behavior in children and youth, including the requirement to create a database that tracks all incidents at the installation level. The budget is also used to support OSD FAP and Service-level data collection, analysis, and reporting as required by law and by DoD and respective Service policies. This budget includes funding for the DoD Family Advocacy Command Assistance Team deployments as needed to respond to allegations of multiple victim child sexual abuse in the DoD sanctioned out-of-home activities and multiple incidents of problematic sexual behavior in children and youth. The budget also includes the operation of the DoD Hotline for reporting allegations of child abuse or safety violations within military child care settings; installation-based public awareness and prevention activities for domestic abuse, child abuse and neglect, and problematic sexual behavior in children and youth; training for professionals and members of the chain of command required to report suspected child abuse and neglect; appropriate command responses to allegations of family violence; and research to support a better understanding of family violence in military families and problematic sexual behavior in military-affiliated children and youth, drive program improvement, and impact policy (as needed). The budget also includes the monitoring of the Service implementation of research-based Incident Severity Scales and the Intimate Partner Physical Incident Risk Assessment Tool, the development of comprehensive screening and assessment instruments for problematic sexual behavior in children and youth, and the implementation of the National Child Traumatic Stress Network learning collaborative platform to train clinical staff and members of the coordinated community response on trauma-informed care and evidenced-based programs. Finally, FAP funds support DoD-level Fatality Review efforts, including the Annual DoD Fatality Review Summit and the DoD policy-required Annual Certification, Accreditation, and Inspection Summit.

The DoD places high value on programs designed to support the professional and personal development of our Service members, as well as their successful transition to the civilian workforce. One way in which DoD delivers this support is to assist Service members in the attainment of academic degrees and certificates that support the attainment of milestones along career pathways. The Voluntary Education directorate manages policy and oversight of the programs that lead to attainments, in accordance with applicable statutes, appropriations, and Executive Orders.

The Office of Financial Readiness was established to address the needs of Service members and their families to make informed financial decisions and meet professional and personal goals throughout the military lifecycle. Section 992 of title 10, U.S. Code, requires the Secretary of Defense to carry out a program to provide comprehensive financial literacy training to members of the armed forces. The Office of Financial Readiness provides policies and programs including centralized counseling support, education strategies, communication efforts, innovative learning modalities, and collaborative partnerships to sustain the overall financial well-being of Service members and families. The Office of Financial Readiness serves as the

Department's focal point to carry out the Secretary of Defense's responsibility for prescribing rules to carry out 10 U.S.C. § 992.

DoDDE is an almost entirely civilian workforce with a small amount of Foreign National labor at locations outside the continental United States. The Foreign National FTEs are further broken down into direct and indirect hires. The direct hires are funded in part or in whole by the U.S. Government.

DoDEA educates 66,293 students in 160 schools in 11 countries outside the United States (Bahrain, Belgium, Cuba, Germany, Italy, Japan, Korea, Netherlands, Spain, Turkey, and the United Kingdom), as well as the CONUS schools located in Alabama, Georgia, Kentucky, New York, North Carolina, South Carolina, Virginia, the Territory of Guam, and the Commonwealth of Puerto Rico.

Key Workforce Issues

Civilian

Projected Size and Associated Cost (\$ in Millions):

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 11,979 | \$1,494.5 |
| FYDP Year 1 (FY 2024): | 11,980 | \$1,568.6 |
| FYDP Year 2 (FY 2025): | 11,981 | \$1,610.0 |
| FYDP Year 3 (FY 2026): | 11,981 | \$1,643.8 |
| FYDP Year 4 (FY 2027): | 11,981 | \$1,678.3 |
| FYDP Year 5 (FY 2028): | 11,981 | \$1,713.6 |

Conclusion

DoDDE provides training, counseling, family assistance programs and outreach services to active-duty U.S. military and DoD civilians as well as a world class education program to their eligible dependents. These services and the quality education of military children affect enlistment, retention, and morale, and is part of the military's operational readiness.

Defense POW/MIA Accounting Agency (DPAA) Manpower Narrative

Introduction

Pursuant to sections 1501, 1509, and 1513 of title 10, U.S. Code, and DoD Directive 5110.10, "Defense POW/MIA Accounting Agency (DPAA)," the DPAA is the sole DoD agency responsible for providing the families and the Nation with the fullest possible accounting for missing personnel from past conflicts (World War II (WWII), the Korean War, Cold War, Indochina (Vietnam) War, Persian Gulf War, the Iraq Theater of Operations) and other conflicts or incidents as the Secretary of Defense directs. Additionally, pursuant to 10 U.S.C. § 1501a, and DoDD 5110.10, DPAA establishes public-private partnerships with non-federal entities and implements regulations, policies, and procedures to facilitate the activities of the Agency and the DoD Past Conflict Accounting Program.

In the effort to account for the more than 81,000 still missing (38,000 are deemed recoverable) from past conflicts, the Agency maintains relationships in 46 countries. These relationships ensure access to enable the conduct of archival research and deployment of investigation and recovery teams worldwide to search, locate, recover, identify, repatriate, and return the remains of the fallen to the families. Additionally, DPAA continues to transform the Department's past conflict personnel accounting mission, which includes the development, implementation and incorporation of public-private partnerships into global field operations, advancement of scientific processes and technologies, historical archival research, and other past conflict accounting lines of effort to more effectively and efficiently account for missing personnel and ensure their families receive the answers they seek.

DPAA is headquartered in Arlington, VA, with laboratories in Hawaii and Nebraska, and detachments (Dets) in Laos, Vietnam, Thailand, and Germany.

The DPAA labor force is composed of GS/GG/SES Civilians, Active-Duty Service members, Foreign Nationals at the Detachments, Support Service Contractors (Laboratory, information technology, and other professional support staff), Fellows from the Oak Ridge Institute for Science and Education, volunteers and partners.

Strategic Priorities, Goals and Challenges

DPAA is responsible for keeping a solemn promise the country has made to the men and women who have defended and continue to defend the Nation and its values. Much as warfare has changed with shifts in geopolitics and advances in technology, DPAA's efforts to research, investigate, recover, identify, and return those still missing from WWII forward continues to evolve and expand, also keeping the promise to future generations.

The Agency Strategic Plan addresses the complexities of today's geostrategic environment, developments in forensic science, and anticipates future challenges DPAA must be prepared to face. In the near-term, DPAA will further case progression to support future expansion and enhancement of the two most important mission imperatives: accounting for individuals and communicating with their families. For the mid-term, the Agency will refine

essential mission enablers like the Case Management System (CMS) and business practices that optimize information sharing and analytically based decision-making. For the longer term, the expansion of and ability to leverage partnerships, with investments in innovation and technology enhancement, will maximize DPAA's efforts across core functions within available resources. This strategy also aligns DPAA with the DoD Planning, Programming, Budgeting, and Execution cycle, as well as with the DoD priorities, and provides the strategic approach with which to best achieve the fullest possible accounting.

Priorities FY23-24. The following DPAA priorities are designed to enable the Agency to "Maximize the capability and capacity to account for eligible missing personnel by taking care of people, leveraging partnerships, and investing in innovation."

- **Taking care of people:** The success we achieve in fulfilling the DPAA mission rests on our people, who are the Agency's greatest asset and play the greatest role in "how" we get to our "why." To promote that success, while fostering an environment where individuals thrive, we encourage and inculcate a culture founded on mutual respect, trust, empowerment, and collaboration. We also recognize the diverse backgrounds of our civilian and military members and will build upon the strengths that diversity brings to our work and seek to both recruit and retain personnel who reinforce and advance this culture. We also apply this culture outwards, communicating with integrity, compassion, and responsiveness to the families of missing personnel, external stakeholders, and to the Nation.
- Leveraging partnerships: Given the inherent challenges of our mission, the Agency must explore all means and methods to account for missing personnel, including capacity and capabilities of partners being integrated throughout the Agency. Partnerships will allow us to facilitate creative solutions and resolve gaps in our capabilities. Through continued development and expansion of partnerships, we will further augment our capacity and capability by leveraging the technology, resources, expertise, and networks of these valuable partners across the continuum of our accounting effort.
- *Investing in innovation/technology enhancements:* Applying their education, training, and experience, DPAA personnel are empowered to incorporate innovative ideas, concepts, and solutions while eliminating redundancies, legacy platforms and methods, and ineffective procedures in their daily operations after appropriate internal coordination. Innovation must also be achieved at the macro level and focus on enhancing internal processes, leveraging information technology in creative ways, fostering relationships with internal and external stakeholders, identifying efficiencies, and building collaborative teams.

The DPAA goals for FY23-24:

- Prioritized execution of field activities in the following conflict order: Vietnam War, WWII, Korean War, Cold War, and Gulf War. Partner activities are concurrently applied across all conflicts.
- Strengthen the Agency's robust network of external partners towards case progression efforts.
- Enhance the CMS and integration of data management across the Agency.
- Enhance research efforts to support an increase of Family Reference Samples for WWII unaccounted-for personnel.

• Enhance and maintain an integrated and proactive strategic communication system. Challenges impacting the Agency's ability to provide the fullest possible accounting for the more than 81,000 still accounted for include:

- Excessive time-to-hire processes causing critical vacancies to remain unfilled, thereby severely impacting the mission today and the future programming, planning, and investments for mission execution over the long term.
- Fully functional CMS to meet the mandate to establish single case files for the mission authoritative system of record for the Agency, along with standardizing Agency-wide and the Past Conflict Personnel Accounting Community business practices.
- Host Nation permissions on the use of partners or performance of partners to support Southeast-Asia field activities necessary to achieve fullest possible accounting for the Vietnam War.

Key Workforce Issues

The DPAA civilian labor force has experienced a significant turnover due to many factors including: greater than anticipated number of retirements, challenging high-cost locations, and substantially long time-to-hire (average greater than 225 days) processes.

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 324 | \$54.3 |
| FYDP Year 1 (FY 2024): | 329 | \$58.1 |
| FYDP Year 2 (FY 2025): | 331 | \$57.9 |
| FYDP Year 3 (FY 2026): | 337 | \$57.9 |
| FYDP Year 4 (FY 2027): | 342 | \$58.0 |
| FYDP Year 5 (FY 2028): | 342 | \$58.0 |

Note: Size and cost include GS/SES and Foreign National employees

The increase in projected size and associated costs reflects the Agency's effort to accelerate the pace and scope of field operations to exceed the goal of accounting for at least 200 unaccounted for personnel annually. The projected infusion of additional historian and research personnel resources is to expedite field investigation and recovery operations for unaccounted for personnel over the FYDP. An increase in research capability is projected as past conflict accounting cases get more complex and the number of cases briefed to families of the missing at Family Member Update meetings require greater time to develop.

Conclusion

Civilian personnel staffing and FTE continue to be a significant management challenge as civilian compensation consumes as much as one-third of the overall DPAA budget. Unforecasted civilian retirements, resignations, and internal promotion opportunities, compounded by an inability to fill vacancies in a timely manner, have resulted in considerable under-execution of civilian personnel end-strength and FTE, albeit with a higher per-FTE cost. Furthermore, growing civilian compensation expenses are a must-pay bill, creating greater pressure on discretionary budget items and impacting field investigation and recovery activities. As well, inflation over the past year has had an affordability impact on contract labor and services provided by other Federal agencies. Acknowledging these compounding factors and the stress they have on the Agency's resources ensures DPAA will utilize all available opportunities to mitigate risk to mission.

Defense Security Cooperation Agency (DSCA) Manpower Narrative

Introduction

The DSCA's mission is to advance U.S. defense and foreign policy interests by building the capacity of foreign partners in order to encourage and enable allies and partners to respond to shared challenges. DSCA also leads the broader U.S. Security Cooperation enterprise in its efforts to train, educate, advise, and equip foreign partners.

DSCA oversees and administers the security cooperation programs that support U.S. policy interests and objectives identified by the Executive Office of the President, DoD, and Department of State. These objectives include developing specific partner capabilities, building alliances and partnerships, and facilitating U.S. access. DSCA applies a whole-of-nation approach to the planning, design, and execution oversight of Security Cooperation programs by partnering with industry, non-government institutions, and various organizations and agencies within and outside the federal government.

DSCA uses a full-spectrum approach to develop partner capabilities. The full-spectrum approach is defined as everything an ally or partner may need to successfully perform a security role with established capabilities, including:

- Understanding requirements, developing forces, and purchasing or obtaining articles and services required to advance, employ, and sustain the capability
- Successfully absorbing and integrating fully developed capabilities into partner security forces
- Effectively and responsibly employing those capabilities in the pursuit of common objectives between the U.S. and the partner
- Adequately staffing, sustaining, and maintaining those capabilities throughout their lifecycle and eventually retiring them when appropriate

A full-spectrum approach looks beyond materiel and associated training solutions and incorporates the necessary policies, legal authorities, strategic frameworks, oversight and governance, management processes and systems, doctrine, operational concepts, command and control processes, human and logistical resources, financial support, and associated infrastructure to enable a partner to successfully perform a particular role.

DSCA integrates the Department's entire portfolio of security cooperation programs in support of a full-spectrum, whole-of-nation approach, and provides guidance to DoD implementing agencies executing those programs in pursuit of a partner's full-spectrum capabilities. Finally, the foundation of our approach is cooperation, underpinned by listening to our international partners and other Security Cooperation stakeholders to identify solutions that meet our common goals and take into account the needs of all stakeholders.

Key Workforce Issues

The DSCA workforce allocation consists of military, civilian and contractor personnel. In FY22, our resourcing levels were 483 civilians, 107 military, and 70 contractors. Our manpower investments address economic, political, and technical aspects of international relations, program management, and logistics management. DSCA missions and operations are increasing at a rapid rate with a constrained number of resources, which requires reprioritization of efforts to ensure limited impact to key mission areas.

As a result of the FY22 NDAA, the establishment of a new Regional Center (RC) for Artic Security Studies was authorized. The Ted Stevens Center for Arctic Security Studies will allow the DoD to create an educational nexus for the Arctic region, advance collaboration with allies and partners, and support interagency collaboration on Arctic security issues, such as addressing impacts from climate change and preserving freedom of navigation. The RC will advance defense and multidisciplinary security studies, analysis, education, engagement, and security cooperation activities.

Civilian:

The DSCA civilian workforce for current and future years as reflected in Comptroller Information System (CIS) remains consistent with past years and reflects the adjusted levels necessary to execute new and significant reform mandated in the FY22 NDAA for the establishment of the Center for Arctic Security Studies.

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 497 | \$78.0 |
| FYDP Year 1 (FY 2024): | 497 | \$79.6 |
| FYDP Year 2 (FY 2025): | 497 | \$81.2 |
| FYDP Year 3 (FY 2026): | 497 | \$82.8 |
| FYDP Year 4 (FY 2027): | 497 | \$84.5 |
| FYDP Year 5 (FY 2028): | 497 | \$86.1 |

Projected Size and Associated Cost (\$ in Millions):

Conclusion

The DSCA continues to work to transform the Security Cooperation workforce to adapt to the 21st century environment. Our stakeholder expectations are high from our international partners, the United States Congress and senior government officials from across the interagency, as well as our industry colleagues. The workforce, our greatest asset, must evolve to be fully trained, certified, and resourced to carry out the critical Security Cooperation mission. This effort will be our highest priority.

Defense Technical Information Center (DTIC) Manpower Narrative

Introduction

The DTIC is an enabler to DoD Science and Technology (S&T) delivery of innovation to the warfighter. By capturing the results of today's research and making it available to all DoD users, DTIC provides the building blocks for the next generation of advancement to allow researchers to start where past efforts left off.

DTIC captures the results of S&T efforts, preserves, curates, and then shares that information. DTIC is transforming and modernizing, transforming from a provider of documents to a knowledge and analysis resource, fusing data and providing visualization to increase understanding and show trends. Collaboration tools encourage cross-component coordination and the Information Analysis Centers provide industry subject matter experts with answers to quick turn questions with the ability to facilitate further research through short term task orders to complex multi-year research and prototyping efforts.

Utilizing the USAF Cloud One environment and working with Defense Innovation Unit and the R&E Joint Reserve Directorate, DTIC is utilizing Artificial Intelligence (AI) and Machine Learning technologies with Development, Security, and Operations (DevSecOps, or rapid security-focused development) capability delivery to provide users state of the art innovative discovery and submission tools. The focus for FY24 is continued enhancement of discovery and analysis into Impact Level (IL) 4 (CUI), 6 (classified) and IL2 (public) networks, while adding consolidation and delivery of a modern submission pipeline based on ecommerce best practices to simplify and reduce effort for submitters, provide them tracking and visibility, while improving the quality and completeness of DTIC's scientific and technical information collection.

In concert with congressional and community interest, DTIC's modernizing efforts are informed by the DoD community to transform distribution, enhance collection, strengthen analytical capabilities on S&T content, and support the management of research data sets. Ongoing modernization activities embrace data-driven concepts and leverage commercial innovations.

In this environment, DTIC is moving rapidly to establish two critical "cells." The first cell, data science, analysis, and user modeling, led by DTIC's Chief Data Officer (CDO), is focused on improving our measurements and then capabilities for users. Our second cell is knowledge management (KM). DTIC is revitalizing our KM focus, establishing a Chief Knowledge Officer and identifying needed support staff. DTIC is also working with the Chief Digital and Artificial Intelligence Officer (CDAO), R&E CDO, and others to develop and staff positions. Data and KM positions are highly skilled, often with PhD degrees, have DTIC competing in a highly competitive market, both in government support and commercial industry.

Freed from the limitations of a physical, under-powered data center, DTIC will use the ondemand computing resources in the cloud to pre-package sought after insights, reducing the timelines and expertise previously needed. Rather than each search returning in seconds, DTIC will execute multiple concurrent searches in response to user queries to provide a complete portfolio of S&T activity, allowing users to select the most relevant information for their needs. DTIC will note choices and tailor future results for those users. DTIC holds a knowledge base of more than 4.7 million information records and is working with the community to increase completeness and quality of records submitted. To meet Open Science objectives, DTIC will accept inventories of peer reviewed journal articles funded by the DoD and make available without embargo, while identifying digital data sets. DTIC will engage with the Department's CDAO to seek methods to improve data quality, focusing on opportunities possible through enterprise data management.

In FY23, DTIC's workforce baseline is 215 funded civilian requirements. DTIC has no military assigned. Future workforce risk associated with DTIC's manpower/staffing plan is related to (1) the timely recruitment and retention of individuals with the critical skills, credentials, and certifications required to support DoD priorities and tasks, such as data analytics and engineering; machine learning; information architecture; information technology and cloud management; and cyber-related talent; (2) the number of retirement-eligible staff members within the existing civilian workforce; and (3) cost growth associated with acquiring skilled contract support.

Key Workforce Issues

Projected Size and Associated Cost (\$ in Millions):

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 215 | \$35.5M |
| FYDP Year 1 (FY 2024): | 215 | \$36.6M |
| FYDP Year 2 (FY 2025): | 215 | \$37.3M |
| FYDP Year 3 (FY 2026): | 215 | \$37.9M |
| FYDP Year 4 (FY 2027): | 215 | \$38.5M |
| FYDP Year 5 (FY 2028): | 215 | \$39.1M |

The projected size and associated cost of the civilian workforce from the previous projection remains relatively the same. DTIC's multi-year development and implementation of new technologies will improve DoD collaboration, data discovery, analysis, and security. DTIC did not transfer functions between civilian and contractor workforces.

Conclusion

In delivering DoD capabilities, DTIC continues to review, examine, and shape its workforce to: (1) effectively meet assigned mission requirements in accomplishing DoD priorities; (2) successfully modernize DTIC technologies, infrastructure, and capabilities; and (3) obtain workforce efficiencies, in terms of cost, skills mix, grade structure, and workforce composition (civilian vs contract).

Defense Threat Reduction Agency (DTRA) Manpower Narrative

Introduction

The United States faces a highly competitive security environment characterized by diverse and dynamic weapons of mass destruction (WMD) risks across multiple domains. Moreover, the complexity of state-based chemical, biological, radiological, and nuclear (CBRN) threats is increasing, compounded by advanced and emerging technologies which can provide adversary WMD programs greater speed, lethality, flexibility, accessibility, and deniability. China and Russia seek to degrade established international norms while rapidly expanding and modernizing their nuclear forces, diversifying advanced conventional systems, and developing CBRN capabilities designed to exploit U.S. and allied vulnerabilities – including within the gray zone short of direct military conflict.

While the threat posed by Russia is acute, China – through rapid strategic military expansion, pursuit of advanced technical capabilities, and an aggressive regional posture – is the pacing challenge. China will continue to use its asymmetric advantage and comparative freedom of maneuver in this operating environment to undertake activities they perceive to be difficult to attribute, low-risk, low-cost, and high reward. Meeting these challenges requires a holistic response that includes integrated deterrence and a campaign-based approach focusing on countering China's WMD activities.

As China continues to weaken the foundations of a stable and open international system, Iran and North Korea pursue advanced warfighting capabilities that undermine regional security and global stability in ways that pose considerable risk to U.S. strategy and priorities. Additionally, the potential for natural or accidental release of biological pathogens or chemical accidents contribute to an ever-evolving CBRN threat environment.

DTRA provides unsurpassed counter WMD (CWMD) support to DoD interagency and international partners, continuously adapting to evolving technical, operational, and geo-strategic demands that determine current and future requirements.

Strategic Overview

DTRA's strategic priorities are aligned with the priorities of the NDS, the Nuclear Posture Review, and other strategic guidance documents which direct DoD to meet our national security goals through integrated deterrence, campaigning, and building enduring advantages. DTRA enables the Department to shape the operating environment and reduce risk to national security objectives by providing technologies and integrated solutions for the most intractable WMD problems. DTRA supports whole-of-government efforts to prevent the acquisition, proliferation, and use of WMD and associated materials and to confound the decision calculus of WMD-armed adversaries.

As both a Defense Agency and Combat Support Agency (CSA), DTRA provides crosscutting solutions to enable the DoD, the United States Government (USG) and international partners to:

- Deter strategic attack against the United States and its allies
- Prevent, reduce, and counter WMD and emerging threats
- Prevail against WMD-armed adversaries in crisis and conflict

While maintaining strong support to the Combatant Commands as a CSA, DTRA will strengthen its role as a DA – and the connective tissue between the two roles – to provide whole-of-Department support to the Secretary through the USD(A&S) and the Assistant Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs. DTRA, through its core functions, will seek to achieve the objectives:

- Ensure a safe and secure nuclear deterrent
- Counter and deter WMD and emerging threats
- Enable the Joint Force to compete and win conflicts against WMD-armed adversaries
- Leverage an adaptive and resilient workforce to achieve DTRA's mission

Key Workforce Issues

The overall FY24-FY28 program reflects continued support in the area of strategic management of human capital as emphasized in the Defense Planning Guidance, the Quadrennial Defense Review, the DoD Communication Playbook and other strategic guidance documents. DTRA is structured to maximize support to the Combatant Commands and Services in support of NDS objectives. In order to better achieve DTRA's stated overall goals, the Agency is planning for, and resourcing goals such as Building an Adaptive and Resilient Agency. DTRA cannot accomplish its mission without recruiting and retaining a world-class workforce, which is diverse, inclusive, and reflects the changes in the broader American demographics. Additionally, DTRA will focus on modernizing information technology and building infrastructure to ensure the workforce is able to operate efficiently and effectively. To this end, the Agency will:

- Refine recently developed Human Capital Plan and develop a Human Capital Roadmap to shape and guide recruitment and human capital investments in FY24 and beyond. Develop a plan to increase the relative percentage of early-career civilian employees that incorporates career adder positions, recruitment efforts, targeted training, and additional workforce flexibilities. Invest in developing additional technical expertise within the workforce across the FYDP.
- Execute DoD direction proceeding from the 2021 White House Executive Order on Diversity, Equity, Inclusion, and Accessibility, as well as requirements stemming from the Women, Peace, and Security Act of 2017 (and its companion 2019 Strategy on Women, Peace, and Security).
- Develop and recruit human capital to build core proficiency and expertise in Sino-linguistic, cultural, socio-political, and military panning areas. Secondarily, re-invest in recruiting and retention of existing subject matter expertise in Russian linguistic, cultural, and socio-political concerns.

Civilian:

The average current fill rate for DTRA's civilian workforce is 85%.

Civilian FTE (Non-Fenced):

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 1,370 | \$261.29 |
| FYDP Year 1 (FY 2024): | 1,385 | \$280.58 |
| FYDP Year 2 (FY 2025): | 1,385 | \$288.24 |
| FYDP Year 3 (FY 2026): | 1,385 | \$294.26 |
| FYDP Year 4 (FY 2027): | 1,385 | \$300.44 |
| FYDP Year 5 (FY 2028): | 1,385 | \$306.74 |

Approximately one-third of the Agency's workforce is comprised of joint military positions. DTRA proactively works with the Services to forecast requisite specialized skills with appropriate position alignment amongst the Agency Directorates. While DTRA has the capability to recruit a robust civilian FTE position fill rate, the Agency is dependent upon the Services to provide trained military personnel. The average current military FTE position fill rate is 81%.

To further balance the workforce, DTRA manages a robust joint Services Reserve Component. The Agency leverages its Reserve manpower to support workload associated with worldwide contingencies, surges, and to augment low active duty component fill rates. DTRA's Reserve manpower is composed of IMAs for which DTRA provides critical annual and inactive duty training. Currently, the Agency has IMAs representing the following Services, as reflected in CIS: Army (95); Navy (1); and Air Force (48).

Conclusion

As China and Russia expand their WMD capabilities and challenge the international order, DTRA is preparing for, and responding to, the current and emerging WMD threats that pose the gravest risks to our nation. DTRA, as the pre-eminent CWMD agency in the USG, must be prepared to meet the challenges of our evolving security environment. We will continue to provide the necessary capabilities, expertise, and programs to support a robust defense against WMD that ensures the United States and its allies are able to deter, prevent, and prevail across the global security environment.

Department of Defense Test Resource Management Center (TRMC) Manpower Narrative

Introduction

The TRMC ensures the readiness of DoD test and evaluation infrastructure to support the NDS. The TRMC ensures and assesses the adequacy of the Major Range and Test Facility Base to support the development, acquisition, fielding, and sustainment of defense systems. The TRMC maintains awareness of other DoD and non-DoD test and evaluation facilities and resources to track how they may affect DoD requirements.

Key Workforce Issues

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 27 | \$6.741 |
| FYDP Year 1 (FY 2024): | 27 | \$7.058 |
| FYDP Year 2 (FY 2025): | 27 | \$7.273 |
| FYDP Year 3 (FY 2026): | 27 | \$7.431 |
| FYDP Year 4 (FY 2027): | 27 | \$7.578 |
| FYDP Year 5 (FY 2028): | 27 | \$7.728 |

The TRMC accomplishes its mission through the mixture of military, civilian, contractor, and Federally Funded Research and Development Center (FFRDC) support.

Military: 2 Civilian: 27 Contractor/FFRDC Support: 244

Conclusion

The TRMC is able to meet its mission requirements at the current strength, but will continue to revisit manpower requirements in the future should the mission change.

Defense Technology Security Administration (DTSA) Manpower Narrative

Introduction

DTSA identifies and mitigates national security risks associated with the international transfer of advanced technology and critical information in order to maintain the U.S. warfighter's technological edge and support U.S. national security objectives.

DTSA's core functions are: (1) National Security Review of Defense Technology Transfers - Assess defense technologies and develops measures, in partnership with government and industry, to prevent proliferation and diversion of technology and information that could prove detrimental to U.S. national security; (2) DoD Export, Technology Release and Foreign Disclosure Policy - Shape international and domestic policies and regulations that protect defense technology and information, while facilitating cooperation with allies and partners; and (3) International Engagements and Technology Security Cooperation -- Work with international partners to protect critical technology and information, increase technology security cooperation, and enhance interoperability.

DTSA is comprised of a mix of civilians, active-duty military, reservists and contractors.

Key Workforce Issues:

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Prior Year (FY 2022): | 129 | \$33.9 |
| Current Year (FY 2023): | 141 | \$38.8 |
| FYDP Year 1 (FY 2024): | 141 | \$38.5 |
| FYDP Year 2 (FY 2025): | 141 | \$39.9 |
| FYDP Year 3 (FY 2026): | 141 | \$40.2 |
| FYDP Year 4 (FY 2027): | 141 | \$40.4 |
| FYDP Year 5 (FY 2028): | 141 | \$41.3 |

Conclusion

DTSA continues to support the National Defense Strategy and align its resources to support evolving mission growth and priorities, to reduce cost where practical, streamline operations and maximize efficiencies where possible.

Missile Defense Agency (MDA) Manpower Narrative

Introduction

Since establishment of the MDA in 2002, the capabilities of the Ballistic Missile Defense System have evolved in the areas of Ground- and Space-based Sensors, Command and Control, Ground-based Weapon Systems, and Sea-based Weapon Systems. The MDA workforce accomplishes one of the most challenging missions facing our nation. A functionally matrixed organization was established in 2006 to efficiently manage the expanding Ballistic Missile Defense System capabilities and government civilians, military Service members, and contractor personnel in multiple locations across the United States and around the globe. As MDA develops, tests, and fields an integrated layered Missile Defense System, MDA works closely with the military departments and the combatant commands who rely on the Missile Defense System to protect the homeland, forward deployed forces, allies and friends from hostile missile attacks. MDA works with combatant commanders to ensure the development of a robust Missile Defense System and future development programs to address the challenges posed by evolving threats. MDA is steadily increasing United States international cooperation through support of mutual security interests in this field. MDA recognizes National Defense Strategy priorities as the catalyst for embedding a dynamic workforce to meet current enterprise goals.

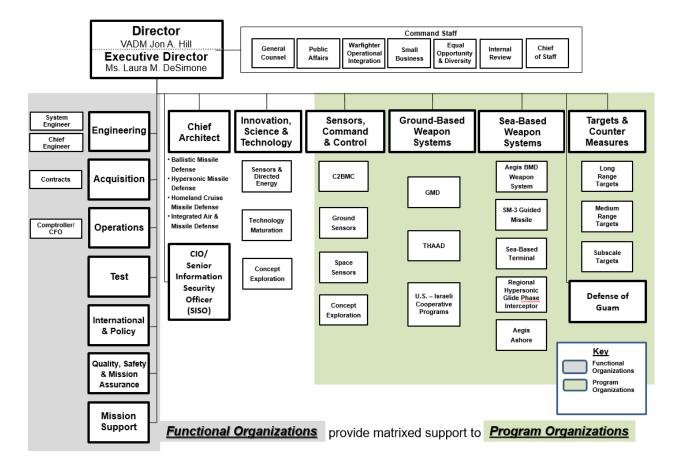

Missile Defense continues to be a national priority as threats become more complex. MDA recently completed an organizational and program workforce assessment and determined that the MDA workforce is appropriately structured and sized to fulfill mission requirements now and into the future within acceptable levels of risk. Additionally, MDA has implemented an annual workforce review to coincide with the most recent President's Budget submission to ensure the workforce is realigned to support changes in programs and priorities. MDA understands its responsibility to the American taxpayer and is committed to maximizing mission assurance and cost effectiveness of our management and operations through continuous process improvement and automation where appropriate. MDA focuses on recruiting and retaining a qualified and diverse workforce to support our national security efforts.

In May 2019, MDA updated its Mission Statement is, "To develop and deploy a layered Missile Defense System to defend the United States, its deployed forces, allies, and friends from missile attacks in all phases of flight."

MDA's priorities remain in alignment with the National Defense Strategy and are:

- **Support the Warfighter** by augmenting Service readiness, logistics support, training, and lifecycle management.
- **Develop and Deliver the Missile Defense System** with focus on increasing lethality, building out missile defense forces structure, and deploying credible deterrence.
- **Outpace the Evolving Threat** by developing architectures that challenge adversary capabilities, quickly mature promising technologies, and deliver with speed.

The below depicts the MDA 2.0 organizational structure with the addition of a new program tasking titled Defense of Guam.

MDA 2.0 centralizes execution of Engineering, Acquisition, Operations, Test, Internationals and Policy, Quality, Safety and Mission Assurance, and Mission Support for all MDA programs. Program Executives manage execution of Innovation; Science and Technology; Sensors/Command and Control; Ground-based Weapon Systems; Sea-based Weapon Systems; and Targets and Countermeasures. The Chief Architect develops architectures for ballistic missile defense, hypersonic missile defense, homeland cruise missile defense, and integrated air and missile defense, placing emphasis on leveraging current Missile Defense System programs to counter new threat capabilities.

Key Civilian Workforce Issues

MDA conducts annual workforce assessments to determine the workforce impact of program decisions made in the President's Budget 2023 submission. The primary purpose of this review is to ensure the proper alignment of the workforce to execute program changes and any other organizational changes or efficiencies implemented since the previous annual workforce review.

MDA's workforce includes government civilians, Service members, and contractor personnel in multiple locations across the United States. The MDA mission requires a highly qualified, technically trained, and experienced workforce including both defense acquisition and competency experience, certification, and training to ensure mission accomplishment. Eighty-three percent of the MDA civilian workforce is assigned to acquisition positions accomplishing one of the most challenging missions facing our nation. MDA is focused on attracting and retaining highly qualified personnel with superior knowledge, skills, drive, and motivation to grow their competencies. MDA strives to sustain and improve continuity of operations across the geographically dispersed missile defense enterprise. To do this, MDA develops and implements initiatives supporting competency-based development while fostering a diverse, mission-ready workforce. MDA promotes a results-oriented performance culture and recruits the most qualified staff to fill critical vacancies. Forty-nine percent of MDA's civilian employees hold degrees at the masters and doctorate levels.

In addition to MDA's Research, Development, Test and Evaluation (RDT&E) funded civilian workforce, MDA has 134 civilians (as of March 7, 2023) supporting Foreign Military Sales cases. MDA maintains an active Missile Defense Career Development Program (MDCDP) designed to recruit and train entry-level civilian employees for promotion into permanent Acquisition positions. MDA's entry level pipeline strategy incorporates hires from feeder programs, such as the DoD College Acquisition Internship Program (DCAIP); Science, Mathematics and Research Transformation (SMART) Scholarship for Service Program for critical science, technology, engineering, and mathematics career fields; and the use of strategic Department direct hire authorities. Annually, MDA hires entry-level professionals from these programs into the MDCDP to assist in replenishing the MDA workforce due to the growing number of retiring employees. Strategic critical career fields include engineering, contracting, intelligence, information technology, and operations research/systems analysis.

MDA also has a robust STEM program, partnering with middle and high school teachers and students to grow and develop a talent pool of equipped applicants into our DCAIP and SMART undergraduate student intern programs. The composition of this workforce will be enhanced and maintained as MDA continues to implement human capital initiatives focused on developing the best and brightest future workforce in support of our mission.

MDA is focused on fostering, maintaining, and continually improving an Agency-wide culture of excellence to uphold the Agency motto "Stellar Team, Noble Mission." An executive team meets weekly to identify and complete Agency-wide initiatives designed to monitor cultural health, hear from employees, identify areas of improvement, and implement initiatives to assist our employees in being active productive participants in meeting the Agency's mission.

MDA's highly skilled workforce includes government civilians, military Service members, and contractor personnel in various locations across the United States and overseas. MDA leverages its contracted workforce of FFRDC personnel and Advisory and Assistance Service support in the critical areas of engineering and technical management, acquisition, contracting, test and evaluation, information technology and cybersecurity, business/financial management, and logistics management to ensure the success of the MDA mission. MDA pursues multiple workforce strategies targeted towards improving quality and professionalism of the workforce today and in the future. MDA fosters diversity and inclusion while aligning hiring actions to our highest priority missions. MDA ensures work is allocated to the lowest appropriate grade and work assignments maximize the utilization of the workforce.

MDA's human capital initiatives and efforts to establish a culture of excellence focuses on increasing retention while becoming an employer of choice. To maintain high work performance, MDA is committed to improving the qualifications and professionalism of the existing workforce, while preparing for the future workforce. MDA is committed to the National Defense Business Operations Plan and currently supports working groups across the DoD. Throughout the human capital life cycle of MDA's workforce, a special emphasis is placed on having civilians in mission critical occupations postured to achieve key training and certification requirements. MDA also utilizes the federal Student Loan Repayment Program and retention program as mechanisms to improve retention of our highly qualified workforce. MDA encourages employees to pursue continuing education through our tuition reimbursement programs and participate in professional development organizations and societies. In addition, MDA focuses on the whole employee by offering flexible work benefits, maximum telework flexibilities, and a superior wellness program with workshop and seminar opportunities in most major areas of mental and physical health concerns.

MDA's annual RDT&E civilian FTE targets and associated cost by FY are:

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 2,143 | \$404.828 |
| FYDP Year 1 (FY 2024): | 2,128 | \$429.818 |
| FYDP Year 2 (FY 2025): | 2,067 | \$429.500 |
| FYDP Year 3 (FY 2026): | 2,067 | \$438.520 |
| FYDP Year 4 (FY 2027): | 2,067 | \$447.729 |
| FYDP Year 5 (FY 2028): | 2,067 | \$457.131 |

Projected Size and Associated Cost (\$ in Millions):

The slight decrease in MDA's annual civilian authorizations target from FY23 to FY24 is attributed to the final implementation of reductions resulting from the FY21 workforce review. The reduction from FY24 to FY25 results from the implementation of the PB20 Fourth Estate Information Technology Optimization, which includes the transfer of up to 61 authorizations to the Defense Information Systems Agency.

Conclusion

As a result of the MDA 2.0 reorganization and implementation of recommendations from internal annual workforce assessments, MDA's civilian workforce is appropriately sized and structured. MDA will continue to review every hiring action to ensure its workforce aligns with Department's priorities and has the skills required to successfully accomplish the mission with acceptable levels of risk while ensuring efficiency and excellence in our workforce.

National Guard Bureau (NGB) Manpower Narrative

Introduction

The NGB is the focal point at the strategic level for non-federalized National Guard matters that are not the responsibility of the Secretary of the Army, the Secretary of the Air Force, or the Chairman of the Joint Chiefs of Staff, in law or DoD policy. The mission, tasks, and functions of the NGB are further defined in DoD Directive 5105.77, "National Guard Bureau (NGB)," October 30, 2015, specifically under Chief, NGB, Responsibilities and NGB Functions, as subsets of paragraph 5 Responsibilities and Functions.

The ARNG is an all-volunteer, Citizen Soldier, a ready force that is "Warfighting-Capable and Governor-Responsive" with competent leaders who provide a decisive operational reserve for the United States Army. Interoperable, disciplined, prepared, and responsive, the ARNG is organized, manned, trained, and equipped to fight and win our Nation's wars while supporting the Nation's Governors. The ARNG FY24 authorized workforce mix consists of 325,000 military end strength and 27,222 civilian end strength (including Military Technicians). The ARNG budget for FY24 is \$19.8B (Operations and Maintenance \$8.7B, Pay and Allowances \$10.8B, and Construction \$0.3B).

The ANG is a combat-ready operational force representing more than one-third of the capability the Air Force employs to fly, fight, and win America's wars. It is a unit-based force comprised of 90 ANG wings and approximately 200 Geographically Separated Units that are ready, trained, and equipped for homeland and global operations. The ANG is also the primary force provider to the North American Aerospace Defense Command, protecting America's skies while continuing to respond to state and local emergencies. FY23 and FY24 military end strength remains consistent at 108,400 while civilian (military technicians and civilian employees) end strength increases from 15,809 in FY23 to 16,195 in FY24, which is the direct result of the Chief of Staff of the Air Force's continued priority to address readiness challenges across the Air National Guard, specifically focused on recapitalizing critical operational capabilities and transitioning from legacy weapon systems into new weapon systems required for today's contested environment. This FY's appropriations invest further into Joint Operations, Command and Control, Cyber, Global Reach, and Air Superiority, structuring the ANG to counter pacing threats domestically and abroad. The ANG budget for FY24 is \$12.7B, of which \$6.3B is allocated for end strength (MilPers + CivPers).

Key Workforce Issues

ARNG Military Technicians provide ARNG units with the administrative and organizational support needed to sustain foundational readiness. Critical functions include maintaining ground vehicles and aircraft, ensuring Soldiers receive pay for duty performed, maintaining personnel and training records, tracking medical actions, scheduling and coordinating training events, maintaining arms rooms, and accounting for supplies and equipment. The support provided by Military Technicians is crucial for the Army National Guard's ability to generate deployable Soldiers and ready units.

ARNG Civilian

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|---------------------------|-----------------|
| Current Year (FY 2023): | 20,960 MILTECH; 5,940 DAC | \$2,910 |
| FYDP Year 1 (FY 2024): | 21,037 MILTECH; 6,185 DAC | \$3,100 |
| FYDP Year 2 (FY 2025): | 21,035 MILTECH; 6,232 DAC | \$3,200 |
| FYDP Year 3 (FY 2026): | 21,037 MILTECH; 6,003 DAC | \$3,240 |
| FYDP Year 4 (FY 2027): | 21,037 MILTECH; 6,033 DAC | \$3,310 |
| FYDP Year 5 (FY 2028): | 21,037 MILTECH; 6,060 DAC | \$3,380 |

In FY23, the ARNG is authorized 28,703 total civilians and is funded for 26,900 (93.7%). This funding includes the Department of the Army Civilians and Military Technicians, including the converted Non-Dual Status Military Technicians.

The ARNG growth in Major Headquarters Activities (MHA) structure is primarily driven by the implementation of the Sexual Harassment and Assault Response Prevention – IRC recommendations to eliminate dual Sexual Assault Response Coordinator and Victim Advocate duty and establish a full-time prevention workforce. Implementation of recommendations continues in FY24.

The FY23 James M. Inhofe NDAA directed the ANG to hold AGR end strength at the FY22 AGR ceiling. ANG Military Technicians provide day-to-day continuity in the operation and training of ANG units. Their functions include technical training, maintaining equipment, and managing quality assurance. For FY24, ANG Military Technicians represent 26% of the full time workforce.

ANG Civilian

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|----------------------------|-----------------|
| Current Year (FY 2023): | 11,025 MILTECH; 4,784 DAFC | \$1,900 |
| FYDP Year 1 (FY 2024): | 10,921 MILTECH; 5,274 DAFC | \$2,000 |
| FYDP Year 2 (FY 2025): | 10,755 MILTECH; 5,349 DAFC | \$2,000 |
| FYDP Year 3 (FY 2026): | 10,702 MILTECH; 5,308 DAFC | \$2,100 |
| FYDP Year 4 (FY 2027): | 10,641 MILTECH; 5,387 DAFC | \$2,100 |
| FYDP Year 5 (FY 2028): | 10,483 MILTECH; 5,440 DAFC | \$2,100 |

FY24 Title 5 end strength is projected to be 5,274 authorizations. Of that total, 193 authorizations are dedicated to HQ-level support per MHAs, 84 authorizations support 1st Air Force, and 417 authorizations provide ANG Readiness Center field-level support. The remaining 4,580 authorizations provide direct unit-level support.

The ANG did not have any transfer of functions involving in-sourcing or out-sourcing during FY23 or any planned during FY24.

Conclusion

Our security environment is more dynamic and complex, and our nation places greater reliance on its National Guard. NGB's focus every day is to ensure the National Guard is ready and has the resources to accomplish its three core missions -- fighting America's wars, securing the homeland, and building enduring partnerships at the local, state, Federal, and international levels.

Pentagon Force Protection Agency (PFPA) Manpower Narrative

Introduction

The mission of the PFPA is to provide force protection, security, and law enforcement to safeguard personnel, facilities, infrastructure, and other resources for the Pentagon Reservation and designated DoD facilities (hereinafter referred to as "the Pentagon Facilities") within the National Capital Region. PFPA addresses the full spectrum of threats by utilizing a balanced approach of comprehensive protective intelligence and counterintelligence analysis, including forensic and biometric-enabled information, to determine the appropriate protective posture for personnel and facilities; prevention, preparedness, detection; all-hazards response; DoD emergency management practices; support the lead response management agency during an emergency or crisis; and provide comprehensive threat assessments, security, and protection services for Office of the Secretary of Defense personnel and other persons. The PFPA is the DoD focal point for collaborating and coordinating with other DoD Components, other Executive departments and agencies, and State and local authorities on matters involving force protection, security, and law enforcement activities that impact the Pentagon Facilities. In order to accomplish the mission, the PFPA is committed to the following strategic goals:

- Lead the nation in protection through best in class innovation, integration, and execution
- Shape the protection environment against current and evolving threats
- Create a culture of high performance, diversity, trust, and resilience

Sixty percent of the PFPA civilian workforce are Police Officers who are an integral part of accomplishing the Agency's critical mission. The Police Officer staffing levels are the agency's area of workforce investment and workforce risk. Time and resources are invested into these positions from recruitment to first day on the job. They are required to complete approximately seven months of training at the Federal Law Enforcement Training Center in Glynco, GA, Cheltenham, MD and with the Pentagon Police Division. Once these employees complete training, there is a significant risk that they will depart the PFPA and join another agency as a Federal Police Officer. The hiring process is repeated each time an Officer departs the agency.

Key Workforce Issues

PFPA's workforce mix (onboard as of January 10, 2023) is currently 1,061 civilians and 14 military. The PFPA currently has a total billet authorization of 1,289. This includes 1,275 authorized civilian billets and 14 authorized military billets. The institution of the Business Objects Enterprise Reporting Service (BOERS) system and the Fourth Estate Manpower Tracking System (FMTS) and their subsequent linkage has ensured that PFPA stays within its authorization. The two systems have also assisted with identifying offsetting reductions and avoiding unnecessary overall growth in the size of the civilian workforce. The systems allow the PFPA to maintain its workforce authorizations. PFPA analyzed the Raven Rock Mountain staffing, organizational requirements, and shortfalls in support of the Agency's FY23 Strategic Plan Objective. Additionally, we validated agency requirements to provide accurate defensible data to effectively advocate, internally, and externally for necessary resources.

Civilian End Strength

| | PFPA PB-23 Labor Profile (FTE) | | | | | | | | |
|---------|--------------------------------|--------|--------|--------|--------|--------|--------|--------|--------|
| | | FY2021 | FY2022 | FY2023 | FY2024 | FY2025 | FY2026 | FY2027 | FY2028 |

| PFPA | | | | | | | | | |
| Total | | \$170.48 | \$180.93 | \$176.48 | \$181.86 | \$185.59 | \$187.84 | \$191.64 | \$195.52 |

PFPA has not transferred functions between their military, civilian, or contractor workforce in FY23.

Conclusion

The PFPA manpower function is critical for the agency to maintain essential staffing levels in support of accomplishing its overall mission. As previously mentioned, the PFPA ensures that it stays within its manpower authorization by utilizing BOERS and FMTS. Manpower accountability assures adequate budgeting to accommodate the staffing requirements of agency employees. PFPA maintains effective procedures to accurately manage manpower resources for all agency positions. These procedures include monitoring allocation and assignment of resources throughout the agency.

Washington Headquarters Services (WHS) Manpower Narrative

Introduction

WHS is the essential services provider for the OSD, DoD Agencies and Field Activities, and other DoD Offices in the National Capital Region (NCR). As technologies evolved and organizations expanded over the years, so too have the mission and responsibilities of the WHS. Services are organized into three main functional areas; People, Business, and Facilities, and are supported by various operational areas throughout the organization. The WHS enables centralized operational support functions to maximize efficiency, emphasizing our commitment to providing leading edge services to our mission partners in support of their defense to the Nation in the following functions:

- Acquisition Directorate
- Executive Services Directorate
- Financial Management Directorate
- Facilities Services Directorate
- History and Library Directorate
- Human Resources Directorate
- WHS Immediate Office Staff
- Raven Rock Mountain Complex (RRMC)

These teams of WHS personnel support the mission of our Defense Department customers by managing DoD-wide programs and operations for the Pentagon Reservation, Mark Center, RRMC, and DoD-leased facilities in the NCR. The WHS vision is to remain a creative, results-driven capabilities provider, recognized for excellence: responsible, reliable, resourceful, and relevant.

WHS is currently authorized 1,859 full-time billets (1,679 civilians, 180 military), with additional support through contracted services.

Civilian Project Size and Associated Cost

| | WHS PB-24 Labor Profile (FTE) | | | | | | | |
|----------|-------------------------------|---------|---------|---------|---------|---------|---------|---------|

Figure 1 - Civilian Labor Funding in Full-Time Equivalents (FTE // O&M - Operations & Maintenance // BMF - Buildings Maintenance Fund // PRMRF - Pentagon Reservation Maintenance Revolving Fund)

Conclusion

The FY24 budget empowers the WHS to continue to be the Department's enabler supporting key administration initiatives and priorities in defense of the nation. WHS continues to review and identify areas of savings to the Department through alignment of functions and developing and implementing better business practices.

Uniformed Services University of the Health Sciences (USU) Manpower Narrative

Introduction

USU is a DoD organizational entity with a direct reporting relationship to the Assistant Secretary of Defense for Health Affairs. The mission of USU is to support the readiness of America's Warfighter and the health and well-being of the beneficiary community by educating and developing uniformed health professionals, scientists, and leaders; by conducting cutting-edge, military-relevant research; by leading the MHS in key functional and intellectual areas; and by providing operational support to units around the world. These mission domains are interwoven, mutually supporting and critical to medical operational readiness.

As the Nation's federal health professions academy, USU is differentiated from its civilian academic counterparts by a specific focus on the diverse operational and peacetime healthcare, research, and training requirements of the MHS, as well as development of military healthcare leaders. USU encompasses four major Schools and Colleges comprising the F. Edward Hebert School of Medicine, the Daniel K. Inouye Graduate School of Nursing, both located in Bethesda, MD; and the Postgraduate Dental College and the College of Allied Health Sciences located in San Antonio, TX. USU's proximity and partnership with the National Institute of Health enables cutting edge medical research and critically contributes to unsurpassed innovation. Similarly, colocation with the Walter Reed National Military Medical Center and our leadership of The National Capital Consortium sponsors all military Graduate Medical Education (GME) programs in the National Capital Region and is the largest GME sponsor within the MHS with 66 fully accredited programs and approximately 700 trainees. USU is home to 16 Centers and Institutes that help advance our research, education, and public service missions. A majority of the Centers are Congressionally-mandated or directed through other DoD issuances and include the Center for Global Health Engagement, National Center for Disaster Medicine and Public Health, Center for Deployment Psychology, Center for the Study of Traumatic Stress, Defense and Veterans Center for Integrative Pain Management, Murtha Cancer Center - recently announced by the White House as a Cancer Moonshot 2.0 participant – and the Defense Medical Ethics Center. Unique to USU, The General Ronald H. Griffith Institute for Military Medical Professionalism, with its emphasis on military medical leadership, medical ethics, and complex military medical legal issues offers curriculum and expertise which is not replicated in civilian medical schools and exemplifies USU's mission differentiation from other academic institutions. Finally, USU oversees the Armed Forces Radiobiology Research Institute, also located in Bethesda, MD, charged with preserving and protecting the health and performance of US military personnel operating in potential radiologically contaminated multi-domain conventional or hybrid battle spaces and urban environments; as well as conducting unique ionizing radiation research and deploying subject matter experts in times of need.

To support all of these directed requirements, USU utilizes a diverse workforce population of civilian and military personnel. The current USU Joint Table of Distribution (JTD) documents 2,029 total requirements. Similar to other Defense organizations, USU is impacted by differences between JTD-documented military manpower requirements and Service-allocated authorizations and personnel assignments.

Key Workforce Issues

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 794 | 131 |
| FYDP Year 1 (FY 2024): | 794 | 136 |
| FYDP Year 2 (FY 2025): | 794 | 139 |
| FYDP Year 3 (FY 2026): | 794 | 142 |
| FYDP Year 4 (FY 2027): | 794 | 145 |
| FYDP Year 5 (FY 2028): | 794 | 148 |

NOTE: The chart does not include additional FTEs to accommodate new USU mission requirements driven by the White House Cancer Moonshot 2.0 initiative. USU anticipates growing by 10 FTEs.

USU has strived to diligently manage its workforce within a constrained resource environment. USU Civilian FTEs through FY28 are stable. Recent examples of Congressional and DoD-directed mission increases include an increase in workload generated by Combatant and Service Component Commands requests for assistance impacting the Center for Global Health Engagement; a new mission requirement to coordinate and inform DoD policy on pain management resulting in the establishment of the Defense and Veterans Center for Integrative Pain Management; growth due to authorization in section 724 of the FY17 NDAA authorizing USU to award undergraduate degrees and the subsequent establishment of our College of Allied Health Science; rightsizing USU's Acquisition Directorate to accommodate significant changes in the contracting, research, and acquisition missions; and the establishment and reorganization of the Office of University Academic Operations. In addition, new USU mission requirements to address the White House Cancer Moonshot 2.0 initiative were most recently programmatically funded, requiring additional civilian FTEs to close gaps in cancer research with respect to the over 1,000 active duty Service members annually diagnosed with cancer and the need to enhance the Readiness of the Force through improved cancer outcomes. Finally, new additional missions in sections 738 and 773 of the James M. Inhofe FY23 NDAA directing DoD to develop a curriculum and certification program to train civilian mental health professionals and students with the specialized knowledge to treat Service members, veterans, and their families, and the study of the feasibility of establishing degree-granting programs in counseling and social work at USU (sections 737 and 767) will need to be evaluated for potential adjustments to USU organizational structure and manpower resourcing.

Conclusion

USU directly supports Warfighter readiness and the health and well-being of the military community by educating and developing uniformed health professionals, scientists, and leaders essential to the successful sustainment of medical operational readiness. The environment in which USU operates continues to change and USU must maintain its highly competent and professional workforce to ensure its complex mission is met. Since its 1972 establishment, USU has trained over 3,000 physician leaders for the DoD and the Nation, and our average medical school class size of 173 students exceeds that of most other US medical schools. Yet, USU has evolved beyond this into a 21st Century multidisciplinary healthcare university with over 11,000 alumni whereby we meet the needs of a medically-ready and ready medical force supportive of DoD operational readiness requirements. Accordingly, we have expanded admissions and increased matriculation to our graduate nursing, public health, health administration, health policy, and other medical education programs as well as providing undergraduate educational opportunities to the MHS enlisted forces. USU's diverse areas of education, leadership training, and research ensures the sustainment of the pipeline producing MHS healthcare leaders that cannot be met alone through other programs such as the Health Professions Scholarship Program or matriculation via direct appointments, nor the residency programs offered within the US civilian health education community.

Communications and Classified Manpower Narrative

Introduction

The Communications and Classified Manpower Request is a consolidated input comprised of the Defense Information Systems Agency (DISA) and the intelligence agencies. In order to protect the interests of national security, explanations will be limited. Additional information can be obtained at higher classification levels.

DISA is a combat support agency responsible for planning, engineering, acquiring, fielding, and supporting global net-centric solutions to serve the needs of the President, Vice President, the Secretary of Defense, and other DoD Components. Its goal is to enable information dominance and support the warfighters and those who support them.

DISA Mission areas include: (1) Enterprise Services (Applications, Mobility, Identity Management); (2) Network Services (Data, Voice, Satellite, Content Delivery); (3) Computing Services (Cloud, Server, Mainframe); (4) Cybersecurity (Incident Management, Inspection, Analysis); (5) Mission Support (Command and Control, Contracting, Spectrum) and (6) Special Missions (White House Communications Agency). Resources also support joint capabilities of the Joint Forces Headquarters-DoD Information Network (JFHQ-DODIN) and the Joint Service Provider (JSP). The JFHQ-DODIN's mission is to support Command and Control, Synchronization Protection, and Enabling Power Projection across the DODIN. JSP's support ultimately ensures efforts and resources to deliver dependable information technology services, enhance network security, and reduce overall information technology costs.

DISA is a premier information technology combat support agency that assures mission essential command, control, communications, computing, intelligence, surveillance, and reconnaissance information reach the warfighter when needed. The Agency delivers enterprise services and data at the user point of need and now serves as the Department's joint operational arm of defensive cyberspace operations. This mission requires purposeful planning, acquisition, operations, and execution.

DISA continues to operate in a contested battlespace, where the barriers to entry by emerging threats are low and oftentimes unchallenged. Mission success is defined by an ability to pre-emptively disrupt, degrade, or deny our adversaries, both internal and external, unimpeded access to the information and capabilities of the DODIN. The Agency must sustain operations and defenses before, during, and after an attack by reducing the attack surface. We strive to continually improve defensive cyberspace operations and effectively provide command and control of the DODIN.

The Defense Intelligence Agency (DIA) provides intelligence capabilities focused on preventing strategic surprise and delivering decision advantage to warfighters, defense planners, and policymakers. DIA performs intelligence and counterintelligence activities that provide capabilities to meet warfighters' operational and tactical requirements more effectively. DIA also provides critical capabilities to the U.S. Government's efforts to detect and counter-intelligence threats from a wide range of traditional and nontraditional adversaries through the advancement and sustainment of offensive and defensive capabilities.

Overall, DIA General Defense Intelligence Program/Military Intelligence Program workforce allocation consists of civilian, military and contractor resources.

DIA continued to re-baselined civilian resources to a level consistent with historic fill rates and programmed pay and will continue to refine across the FYDP.

The National Geospatial-Intelligence Program (NGP) is the nation's primary provider of Geospatial Intelligence (GEOINT). The NGP is responsible for timely, relevant, and accurate GEOINT products and services for national security, combat support and disaster response. We serve a full range of customers that include policymakers, the Intelligence Community (IC), the U.S. military, mariners and pilots, first responders, and international partners. Furthermore, the Director, National Geospatial-Intelligence Agency (NGA), as the GEOINT Functional Manager, leads the GEOINT enterprise by coordinating end-to-end GEOINT and leveraging capabilities to ensure the U.S. is postured to address today's critical missions as well as maintain dominance against future threats.

NGA civilian personnel make up most of the total workforce, while contractors and military personnel comprise the rest. NGA regularly reviews this data to ensure an appropriate workforce mix is maintained to best serve the GEOINT mission.

The GEOINT workforce is the foundation for our success. Advances in data and technology are changing the diversity, scale, complexity, and pace of NGP's mission. NGA continues to invest in the ability to recruit, engage, develop, train, and retain a workforce that advances tradecraft skills and innovated solutions to meet emerging mission needs. Sustaining training in data science and artificial intelligence, maximizing use of machine language technologies, and advancing computational thinking for NGA employees in both operational and enabling mission areas will improve skills to effectively leverage data and generate analytic products and reports for decision making.

The National Security Agency/Central Security Service leads the U.S. Government in cryptology that encompasses both signals intelligence and information assurance (now referred to as cybersecurity) products and services and enables computer network operations in order to gain a decision advantage for the Nation and our allies under all circumstances.

Key Workforce Issues

Civilian:

| | Current/Project Size | Associated Cost |
|-------------------------|----------------------|-----------------|
| Current Year (FY 2023): | 50,827 | \$8,932.7 |
| FYDP Year 1 (FY 2024): | 52,103 | \$9,449.4 |
| FYDP Year 2 (FY 2025): | 53,014 | \$9,824.6 |
| FYDP Year 3 (FY 2026): | 53,547 | \$9,999.2 |
| FYDP Year 4 (FY 2027): | 53,870 | \$10,287.6 |
| FYDP Year 5 (FY 2028): | 53,940 | \$10,501.3 |

Projected Size and Associated Cost (\$ in Millions):

*Funding totals are approximations.

DISA and the intelligence agencies civilian manpower increased by approximately 2.5 percent between FY23 and FY24. Additional details can be provided at a higher classification level.

Conclusion

The workforce that supports DISA and the intelligence agencies is a mix of civilians, military, and contractors that is the foundation for their success. The missions require advanced technical skills to be agile and adaptable, embrace automation for repeatable tasks, answer the most challenging intelligence questions and address information technology needs of the community. DISA and the intelligence agencies cultivate new staff, retain existing employees, and reskill talent, as necessary, to ensure the right skills are in the right place at the right time to be successful.

United States Africa Command (USAFRICOM) Manpower Narrative

Introduction

USAFRICOM is the U.S. Defense Department's Combatant Command responsible to the Secretary of Defense for military relations with African nations, the African Union, and African regional security organizations. A full-spectrum Combatant Command, USAFRICOM is responsible for all U.S. DoD operations, exercises, and security cooperation on the African continent, its island nations, and surrounding waters (excluding Egypt).

Mission: USAFRICOM, with partners, counters malign actors and transnational threats, responds to crises, and strengthens security forces in order to advance U.S. national interests and promote regional security, stability, and prosperity.

As of the FY24 President's Budget, USAFRICOM's FY23 workforce mix is 452 civilians and 379 full-time military (Active and Full-Time Guard/Reserve). This does not include the Military Intelligence Program, which adds 250 civilians and 202 full-time military. In the latest Inventory of HQ Contracted Services, the command has approximately 232 contractor FTE.

Going on its fifteenth year of operation, USAFRICOM continually reviews its structure and works to legally and efficiently leverage its resources through a whole-of government "3-Ds" approach — diplomacy, development, and defense — to degrade violent extremist organizations, outcompete strategic adversaries, and maximize U.S. access and influence. In collaboration with allies and partners, USAFRICOM will foster democracy, rule of law, human rights, and prosperity throughout the African continent.

Key Workforce Issues

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 452 | \$83.31 |
| FYDP Year 1 (FY 2024): | 463 | \$92.90 |
| FYDP Year 2 (FY 2025): | 463 | \$95.53 |
| FYDP Year 3 (FY 2026): | 463 | \$97.54 |
| FYDP Year 4 (FY 2027): | 463 | \$99.58 |
| FYDP Year 5 (FY 2028): | 463 | \$101.67 |

Small increases in manpower resources were approved for Cyber (2 FTE, 1 in FY23, 1 in FY24). Additionally, in FY24, USAFRICOM received resources (+10 FTE) for Civilian Harm Mitigation and Response.

Conclusion

USAFRICOM faces a growing pace of operations, mission requirements, and engagements on the African continent while experiencing the impacts of the mandated headquarters' reductions. USAFRICOM continues to execute the Command's mission in its Area of Responsibility (AOR), but workforce limitations combined with a constantly evolving threat environment will continue to stress its ability to be an engaged and effective representative of U.S. national security interests on the African continent.

United States Central Command (USCENTCOM) Manpower Narrative

Introduction

United States Central Command is a premier warfighting Combatant Command. United States Central Command's (USCENTCOM) mission started in 1983 to serve as a hedge against the expansionist goals of Iran – then in the nascent days of its new anti-American regime – and to serve American interests in the Middle East, Levant, and Central Asia amidst strategic competition with the Soviet Union. Forty years later, while much of geopolitics and policy has transformed, the security landscape of this part of the world remains largely unchanged. In many important ways, the region's most vexing problems have grown more complex.

Now, as then, the world's geographically central region remains critical to American security interests, global trade, global energy, and global security. This part of the world produces 37 percent of the world's oil, 18 percent of its gas, and houses four of the world's top five OPEC oil producers: Iraq, Kuwait, Saudi Arabia, and the United Arab Emirates. The central region remains among the most important regions in the world. A disruption in the maritime choke points flowing through the Middle East or the spread of instability throughout the region could threaten vital national interests and hold the global economy at risk.

As USCENTCOM enters its fifth decade, USCENTCOM requires a new Strategic Approach to guide all operations, activities, investments, and initiatives against these complex and confounding challenges. That Strategic Approach is defined: People, Partners, and Innovation.

People: Throughout USCENTCOM's lifespan, its people have served the region, our Nation, and this command. Since 1983, our people have fought for and aided the citizens of the world's central region. Our people at USCENTCOM are our greatest asset and our most critical resource.

Partners: Partners are our nation's comparative advantage against competitors like the People's Republic of China and Russia and serve as a barrier against the ramifications of Iran's most destructive behavior. USCENTCOM was formed to serve in support of and alongside Partners – the "local and regional forces" referenced by legislation. The Senate Armed Services Committee stated in 1983, USCENTCOM was established to serve as a "security guarantor of American Interests in the world's central region." Today, we still uphold that responsibility by integrating our Partners into a framework of operations, activities, investments, and initiatives ensuring sufficient regional security to protect our vital national interests.

Innovation: Through Innovation we multiple the capability of our People and strengthen our partnerships to deter Iran, counter violent extremist organizations and complete with China and Russia for influence across the region. The USCENTCOM theater holds almost no assigned forces, and with the declining emphasis on defeating violent extremist organizations and the National Defense Strategy shift in primary focus to U.S. strategic competitors, our forces decreased 15% over the course of 2022 alone. USCENTCOM must innovate to expand our presence beyond those allocated forces. This is enabled by the creative application of technology and innovation.

Through innovation Task Forces, USCENTCOM seeks to serve as the experimentation center for new drone-defeat systems, ideas, and technology, to include directed energy. USCENTCOM considers opportunities for innovation as limitless. They are boundless and cross all realms of possibility. As a data-centric warfighting headquarters, USCENTCOM transformed its targeting process from PowerPoint slides to the employment of live data. USCENTCOM's goal is a Single Pane of glass that builds better situational understanding and allows commanders to achieve decision advantage like never before.

Each of these tools, concepts, initiatives, and task forces are singularly focused on providing USCENTCOM's people with the best tools, the most comprehensive rapid situational awareness, and the fastest and most accurate decision-making capability. The USCENTCOM region is literally and figuratively central to competition with Russia and China, an NDS priority for all the Joint forces. USCENTCOM's strategic approach aligns against Strategic Competition with the People's Republic of China and Russia, which the NDS identifies as the priority across all global regions.

Key Workforce Issues

Civilian:

Projected Size and Associated Cost (\$ in Millions): (Excludes Intelligence Program)

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 424 | \$55M |
| FYDP Year 1 (FY 2024): | 435 | \$58M |
| FYDP Year 2 (FY 2025): | 435 | \$59M |
| FYDP Year 3 (FY 2026): | 435 | \$61M |
| FYDP Year 4 (FY 2027): | 435 | \$61M |
| FYDP Year 5 (FY 2028): | 435 | \$61M |

The Headquarters' authorized strength is capped to preclude overall growth. Recent Defense program decisions include an increase to USCENTCOM's cyber operations program of 5 military and 1 civilian in both FY23 and FY24.

USCENTCOM had several significant programming actions spanning FY20 thru FY23 requiring manpower positions; to support bringing U.S. Space Command to full operational capability, USCENTCOM's headquarters was reduced by 21 positions (11 active component military, five reserve component military and five civilian positions). The direction to stand-up the Joint Military Information Support Operations Web Operations Center required USCENTCOM to internally realign 13 positions (nine active component military and four civilians) from existing missions to support this initiative. In FY20, USCENTCOM reduced four positions (three active component military and one civilian) in support to USEUCOM's Russian Initiative. The establishment of the Joint Electromagnetic Spectrum Operations Center in FY22 was another mission growth area for USCENTCOM.

Changes to the Unified Command Plan (UCP) in 2021 expanded the USCENTCOM Area of Responsibility by transferring Israel from USEUCOM resulting in a transfer of mission and resources.

USCENTCOM will also be implementing two new SecDef-directed programs in the next 1-3 years: Civilian Harm Mitigation and Response which will improve how DoD mitigates and responds to civilian harm resulting from military operations; and approved recommendations from the IRC on Sexual Assault.

Conclusion

The USCENTCOM AOR remains challenging and dynamic and will into the unforeseen future. People, Partners, Innovation is USCENTCOM's glidepath to deter Iran, counter VEOs, and complete strategically, allowing us to meet the challenges posed by these threats, complexities, and adversaries and ensure regional security and stability. USCENTCOM employs this strategic approach along a foundation of regional stability earned by American Servicemembers over the course of four decades. USCENTCOM troops have fulfilled the original promise of this command "US Central Command, alongside local and regional forces, will be America's security guarantor in the world's central region." Troops across the forty-year history of CENTCOM are the forebears of the Soldiers, Sailors, Airmen, Marines, Coastguardsmen, and Guardians who serve in USCENTCOM today. Armed with the right strategic approach and the right measure of resources, they will succeed today and into USCENTCOM's future.

United States Cyber Command (USCYBERCOM) Manpower Narrative

Introduction

USCYBERCOM has the mission to direct, synchronize, and coordinate cyberspace planning and operations to defend and advance national interests in collaboration with domestic and international partners. The Command has three focus areas: Defending the DoDIN, providing support to combatant commanders for execution of their missions around the world, and strengthening our nation's ability to withstand and respond to cyber-attacks. The Command unifies the direction of cyberspace operations, strengthens DoD cyberspace capabilities, and integrates and bolsters DoD's cyber expertise. USCYBERCOM improves DoD's capabilities to operate resilient, reliable information and communication networks, counter cyberspace threats, and assure access to cyberspace. USCYBERCOM is designing the cyber force structure, training requirements and certification standards that will enable the Services to build the cyber force required to execute our assigned missions. The Command also works closely with interagency and international partners in executing these critical missions.

Strategic Priorities, Goals and Challenges

Executing under the DoD Cyber Excepted Service capability increases civilian cyber talent fills through recruiting and hiring events; whereby, USCYBERCOM can conduct on-the-spot interviews leading to immediate job offers. However, USCYBERCOM continues to struggle with recruiting, hiring, and keeping qualified cyber and information technology professionals due to competition of defense contractors and private companies outside of government service.

Key Workforce Issues

Polygraph requirement timelines for civilian workforce: USCYBERCOM has an average of 408 days to on board due to the uniqueness of their locations within the NSA. The lengthy security clearance process causes frequent civilian declinations due to the requirements of a TS/SCI, Counter Intelligence Polygraph, and Notification of Foreign National Associations.

Active Component, Reserve Component, and National Guard (Army/AF only):

USCYBERCOM military manning is a challenge as we compete with branch of Service operational requirements for skillsets that are high demand (Cyber/Intelligence) low density and unique requirements (experience level/rank/Service affiliation). All Military Departments continue to lack the required number of fully trained and qualified personnel across the Cyber Mission Force and face chronic personnel shortfalls in key work roles due in part to below average Service retention rates. Cyber operations are in the top career field shortfalls. The challenge USCYBERCOM faces is getting backfills for individuals leaving the command prior to normal rotations, being detailed to cover higher priority gaps within Command or retiring.

Civilian: Without DIA, EBC numbers begin in FY24

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 575 | \$104.00 |
| FYDP Year 1 (FY 2024): | 2,560 | \$461.34 |
| FYDP Year 2 (FY 2025): | 2,564 | \$485.11 |
| FYDP Year 3 (FY 2026): | 2,567 | \$501.22 |
| FYDP Year 4 (FY 2027): | 2,569 | \$511.48 |
| FYDP Year 5 (FY 2028): | 2,571 | \$522.14 |

Projected Size and Associated Cost (\$ in Millions):

• USCYBERCOM will have an Air Force Manpower Analysis Agency or contract assessment in FY24 to identify potential redundancies across the command. In addition, the assessment will review new and expanded USCYBERCOM mission and calculate that workload.

• There have not been any military and civilian conversions and no military/civilian conversions to contractor personnel.

• USCYBERCOM has contracted workload due to the inability to acquire the specific expertise needed to perform the mission in-house. At times USCYBERCOM used contractor personnel to bridge temporary gaps in functions while awaiting the acquisition of billets and/or people.

Conclusion

The strategic end state for the United States is to sustain a favorable distribution of global power. The end state for USCYBERCOM is that the adversaries are unable to gain strategic advantage in, thru, and from cyberspace. Persistent engagement sustains advantage in competition and prepares for cyber lethality in war. Cyberspace is a fluid environment of constant contact and shifting terrain. New vulnerabilities and opportunities continually arise as new terrain emerges.

United States European Command (USEUCOM) Manpower Narrative

Introduction

USEUCOM is transitioning from a Theater Security Cooperation Headquarters to a Warfighting Command postured to carry out its responsibilities in support of the National Security Strategy (NSS) and NDS. The command is one of two forward-deployed Geographic Combatant Commands. Its Area of Responsibility (AOR) covers almost one-fifth of the planet, including all of Europe, portions of Asia, the Middle East, the Arctic and Atlantic Oceans. USEUCOM manages U.S. military relations with NATO and 51 countries spanning across two continents over an area with a population of nearly a billion people. Additionally, there are approximately 115K personnel in theater supporting steady state and contingency operations. USEUCOM executes a full range of globally integrated multi-domain operations in coordination with NATO, allies, and partners to compete, and deter attack in the USEUCOM AOR in order to defend the Homeland Forward and fortify Euro-Atlantic Security. USEUCOM prepares to respond alongside Allies and partners to prevail in any conflict, should deterrence fail.

Key Workforce Issues

USEUCOM's FY24 structure is comprised of 54% military and 46% civilian authorizations. The command's MHA workforce authorization allocation/mix includes 310 military and 211 civilians. USEUCOM's total MHA and Non-MHA workforce mix is 854 military (Active Component), 45 military (Guard/Reserve), and 776 civilians (GS/GG/FN) on the Joint Table of Distribution (JTD) totaling 1,675 authorizations and 986 military (Guard/Reserve) on the Joint Table of Mobilization Distribution (JTMD). Base funding consists of 40% of the command's obligations. New and expanded mission and capability sets across the joint enterprise have outpaced DoD's allocation of resources to the Combatant Commands. USEUCOM anticipates continued manning and resourcing deficits. Manning shortfalls are addressed through using reserve support and contract utilization.

Headquarters Department of the Army is USEUCOM's Combatant Command Support Agency. USEUCOM's current civilian fill rate is 84% (includes DIA civilian fill rate).

Civilian:

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 454 | \$62.5 |
| FYDP Year 1 (FY 2024): | 461 | \$64.7 |
| FYDP Year 2 (FY 2025): | 461 | \$65.9 |
| FYDP Year 3 (FY 2026): | 461 | \$67.2 |
| FYDP Year 4 (FY 2027): | 461 | \$68.5 |
| FYDP Year 5 (FY 2028): | 461 | \$69.9 |

Projected Size and Associated Cost (\$ in Millions):

USEUCOM's JTD for this report reflects a civilian workforce mix consisting of U.S. Army Direct Hires, Foreign National Hires, and Local National Hires. Exclusion of DIA manpower and costing data in this year's report for classification purposes make year-over-year number comparisons difficult, but any growth in civilian manpower reflect the Services' ability to source growth areas with civilian manpower, rather than a result of command requests for exclusively civilian positions to address shortfalls. During FY22-23, there were no functions transferred between the military, civilian, and contractor workforces. USEUCOM consistently seeks to optimize the military-civilian-contractor mix, within the constraints of the Joint Manpower Validation Process (JMVP), in order to maximize mission effectiveness while controlling costs. FY24 President's Budget Decision (PBD) manpower impacts to USEUCOM resulted in the increase in FYDP of five JTMD authorizations. This action restores PDM 704A1 (Dated 20 Dec 2020) for USSPACECOM stand up.

Conclusion

In an environment where increases in mission requirements often outpace the ability to reallocate resources, USEUCOM frequently reassesses its capabilities through the lens of the NDS as they expand the competitive space with Russia and reorient towards great power competition. USEUCOM embraces the Secretary of Defense's review of the combatant commands and sees these assessments as an opportunity to assign resources consistent with NSS and NDS priorities.

USEUCOM completed a Manpower and Capabilities Study of all Directorates with the exclusion of the Directorate of Intelligence and the Directorate of Plans Offices of Defense Cooperation in FY21 prior to Russia's invasion of Ukraine. The scope of the study centered on the best way to accomplish the mission with existing resources prior to the invasion of Ukraine. The assessment focused on the following areas: (a) deep dive analysis in targeted areas as directed by DCOM/CoS; (b) prioritization of functions, and (c) where to accept risk (or eliminate it). The assessment highlighted certain capability, capacity, and resource alignment recommendations to improve capabilities supporting USEUCOM's continued transformation from a headquarters formerly optimized for security assistance and building partnership capacity, to a highly operational command with an increased focus on readiness and warfighting to execute NDS priorities. Executing and sustaining operations in the current operational environment further exacerbates capability and capacity gaps within the Headquarters. In a resource-constrained environment, prioritization and resource reallocation allow for the acceptance of risk in lower priority mission areas.

United States Indo-Pacific Command (USINDOPACOM) Manpower Narrative

Introduction

USINDOPACOM protects and defends, in concert with other U.S. Government agencies, the territory of the United States, its people, and its interests. USINDOPACOM is committed to ensuring a free and open Indo-Pacific alongside a constellation of like-minded Allies and Partners, united by mutual security, interests, and values in order to deter adversary aggression, protect the Homeland, and be ready to fight and win in armed conflict. The command's strategic approach is based on partnership, presence, and military readiness. Focus areas include: enhancing design and posture; increasing joint force lethality; strengthening allies and partners; and exercise, experimentation, and innovation.

USINDOPACOM recognizes the global significance of the Indo-Pacific region and understands that working together is the best way to meet challenges. Consequently, USINDOPACOM will remain an engaged and trusted partner committed to preserving the security, stability, and freedom upon which enduring prosperity in the Indo-Pacific region depends. USINDOPACOM's priorities are to Defend the Nation through Integrated Deterrence, Increase our Warfighting Advantage, and Strengthen our Relationships with Allies and Partners.

Key Workforce Issues

Strategic Priorities, Goals and Challenges

Following the August 2022 CDRUSINDOPACOM Execution Assessment on the Command's ability to achieve **Seize the Initiative**, delivered to SECDEF at the classified level, critical manpower gaps were identified to achieve emerging 2022 National Defense Strategy and priorities identified in the PRC Campaign Implementation Guidance (CIG). While a holistic manpower study is underway, USINDOPACOM assesses that shortfall around 400 manpower positions to achieve both near-term (FY24-FY25) and long-term (FY26-FY28) requirements. Of the 278 near-term requirements, 143 have been identified as critical requirements in FY24 alone. The Secretary of Defense has supported accelerated manpower growth of the 143, 103 civilians and 40 contractors, in the FY24 President's Budget. The 143 positions are synchronized with 19 key Command programs directed and/or by name supported in the NDAA, NDS, and other National security documents. These key programs have deliverables in the near-term and require personnel to be on-duty in FY24. Failure to resource these key programs, including the human capital requirement, would cause direct delays and impacts on the delivery of these capabilities.

The five major functions of the 143 are:

- 1. Planners 12 (OPLAN/CONPLAN, Jt Exercises, Accountability)
- 2. Operational Imperatives 90 (Int. Jt Fires Ctr, Perception Mgmt, JOC C2 Evolution)
- 3. Allies & Partners 6 (FAO, Desk Officers, Int. Exp & Warfighting Caps)
- 4. Tech Expansion 21 (PMTEC, MPE, AI Wargaming, Data Mgmt, Info Ops)
- 5. Increased Support Function 14 (Critical Log Network, Assessments, Dec/Dat/Training Analysts)

The pandemic disrupted accession rates, which further degraded existing skill gaps and units. End-of-year end strength is less than the authorized end strength, exacerbating existing

poor military occupational specialty health and suboptimal entry level and reduced accession and follow-on training schools. This, combined with recruitment shortfalls for the Services, is having a negative impact on the fill rates at INDOPACOM.

Component Workforce Allocation/Mix:

USINDOPACOM Workforce Mix for FY23 (not including Intel) is 804 Active Military, 1,377 Reserve Component, and 584 Civilians for 2,765 total force.

Workforce Risk:

As mission requirements increase exponentially within the Indo-Pacific theater, the timeline to achieve effects is rapidly closing. USINDOPACOM continues to be resourced less than optimal to perform mission priorities and relies heavily on contract and Active Duty for Operational Support (ADOS) (Reserve forces) support to mitigate risk resulting from Active Component (AC) military capability gaps. Service active duty operational support (ADOS) continues to be significantly reduced, having a negative impact to the HQ's ability to mitigate risk through short and long-term ADOS augmentation. Additionally, 90% of Reservists assigned to the Joint Table of mobilization and distribution do not reside at the location of their assigned unit.

Civilian (not including Intelligence Civilians):

| | Current/Projected Size | Associated Cost** |
|-------------------------|------------------------|-------------------|
| Current Year (FY 2023): | 584 | \$115.63 |
| FYDP Year 1 (FY 2024): | 682 | \$135.04 |
| FYDP Year 2 (FY 2025): | 682 | \$148.54 |
| FYDP Year 3 (FY 2026): | 682 | \$163.39 |
| FYDP Year 4 (FY 2027): | 682 | \$179.72 |
| FYDP Year 5 (FY 2028): | 682 | \$197.69 |

Projected Size and Associated Cost (\$ in Millions)*:

* Includes Foreign Direct Hire and Foreign Indirect Hire Positions for Navy and Army funding

** Cost data available upon request

Workforce retirement eligibility at HQ USINDOPACOM:

• 21% of workforce is eligible to retire in CY23

- 26% of workforce will be eligible to retire within 5 years (CY23-CY27)
- 53% of workforce will be eligible to retire in CY28 and beyond

With the current budget constraints, USINDOPACOM closely reviews/approves only limited numbers of hard-to-fill positions using Superior Qualifications Appointment (SQA) and recruitment/relocation hiring incentives. Permanent Change of Station (PCS) costs are not included for civilian recruitments unless under very rare circumstances. Recruitment and retention of information technology/Cyber positions, Joint Fires & Targeting Specialists, Foreign Disclosure Officers, Strategic Analysts and other high demand skill-set positions without incentives has also impacted talent management in retaining quality employees and obtaining

highly rated candidates to live/work in Hawaii. Challenging hiring strategies to fill overhire Temporary positions not to exceed one year or less are also difficult recruitments since funding is approved only one year at a time. However, Term hires of at least two years on the initial recruitment (with possible extensions) are more attractive and Term Appointments may be converted to permanent if advertised as such.

Conclusion

USINDOPACOM is committed to enhancing stability in the Indo-Pacific region. The command continues to review and prioritize the command's missions to mitigate risk, close capability gaps, adapt to National Defense Strategy priorities and secure a free and open Indo-Pacific.

The greatest danger to the future of the United States continues to be an erosion of conventional deterrence. Without a valid and convincing conventional deterrent, China is emboldened to take action in the region and globally to supplant U.S. interests. As the Indo-Pacific's military balance becomes more unfavorable, the U.S. accumulates additional risk that may embolden adversaries to unilaterally attempt to change the status quo.

United States Northern Command (USNORTHCOM) & North American Aerospace Defense Command (NORAD) Manpower Narrative

Introduction

USNORTHCOM is the geographic combatant command responsible for defense of the United States homeland. USNORTHCOM is also tasked with providing defense support of civil authorities and engaging in theater security cooperation with regional allies and partners. NORAD is a distinct, bi-national command responsible for aerospace warning, aerospace control, and maritime warning in defense of the United States and Canada. NORAD and USNORTHCOM look to a future marked by rapid shifts in the geopolitical environment and technological advancement. Success requires collaboration with innovative industry and interagency partners, including rapid development and fielding of the systems required to defend our nations, present and future. The Command's vision is to outpace global competitors, deter adversaries, and deny and defeat threats through all-domain awareness, information dominance, decision superiority, and global integration.

NORAD and USNORTHCOM are driving digital transformation and shifting their workforce culture in an effort to focus on global integration, all-domain awareness, information dominance, and decision superiority. Leading in technological advancement is crucial to staying vigilant in the defense of the nation as more adversaries adapt to using technological threats. NORAD and USNORTHCOM struggle to recruit, hire, and retain highly qualified cyber, information technology, and data analytic experts due to competition with the private sector. To minimize the risk, NORAD and USNORTHCOM utilize direct hiring authorities, where authorized, to streamline the hiring process, allowing the Commands to cast a hiring net beyond the traditional Federal government "USA Jobs" platform to attract top talent and increase applicant diversity.

Key Workforce Issues

NORAD and USNORTHCOM FY23 workforce authorization allocation/mix consists of 772 active military and 861 civilians supporting its missions (Numbers do not include Major Force Program (MFP) 03 authorizations or Canadians).

Civilian Workforce retirement eligibility:

- 36% of workforce is eligible to retire in FY23
- An additional 25% of the workforce will be eligible to retire within 5 years (FY23-FY28)

Civilian:

Projected Size and Associated Cost (USNORTHCOM/NORAD) (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 883/108 | \$90/\$14 |
| FYDP Year 1 (FY 2024): | 878/125 | \$96/\$17 |
| FYDP Year 2 (FY 2025): | 891/131 | \$99/\$18 |
| FYDP Year 3 (FY 2026): | 902/136 | \$101/\$18 |
| FYDP Year 4 (FY 2027): | 908/139 | \$104/\$18 |
| FYDP Year 5 (FY 2028): | 918/140 | \$106/\$18 |

Notes: Costs only include those attributed to direct hires funded by US Air Force O&M.

NORAD and USNORTHCOM are comprised of 53% civilian work force (MFP 03 and Canadians not included).

NORAD and USNORTHCOM continue to explore opportunities to optimize and leverage the right force mix/talent, within resource constraints, in order to maximize mission effectiveness and reduce cost.

Conclusion

NORAD and USNORTHCOM have a unified strategic objective ensuring a safe and secure North America. The current dynamic environment requires collaborative efforts across both governments and necessitates strengthening partnerships and developing globally integrated solutions among nations that share our values. Given the current pace of technological advancement, the two-year budgeting process and protracted acquisition timeframe do not allow the flexibility to take full advantage of the forward-thinking solutions industry partners can offer. The future fight requires our ability to achieve persistent all-domain awareness, information dominance, decision superiority, and global integration of the joint force as we deter in competition, de-escalate in crisis, and if required, deny and defeat attacks on our nations.

United States Special Operations Command (USSOCOM) Manpower Narrative

Introduction

USSOCOM will continue rebalancing the Total Force in an effort to ensure the optimal force sizing construct. While meeting global commitments and adjusting to emerging threats the force is being stressed to maintain readiness, meet deployment challenges, provide the most realistic training to the newest members of the Special Operations Force (SOF) team, and continuing the long-standing belief that humans are our most important resource. With an uncertain strategic environment, while meeting the multitude of current requirements, shaping the force of tomorrow remains the challenge of today, particularly balancing between Active, Reserve, Guard, civilian, and contractor requirements.

Strategic Priorities, Goals and Challenges

Given this challenging environment, USSOCOM continues to work toward striking the right balance between readiness, sustaining the All-Volunteer Force, and reduced resources to fund military end strength and civilian manpower. The ability to resource near-term readiness under affordability constraints while sustaining the current force levels requires the continuing balance between future growth and near-term readiness, including equipment and facilities sustainment. USSOCOM will monitor all aspects of the force in continuing to develop the premier SOF of the future.

While SOF has healthy recruiting, retention, and manning today, it is vital USSOCOM update our policies to deal with challenges before they are confronted with a crisis. As with the weapons systems USSOCOM uses, it must continue to refresh its manpower and personnel systems to keep pace with a rapidly changing world. Thus, USSOCOM will continue to evolve its systems, policies, and practices, and when appropriate, pursue further modernization to ensure flexibility and opportunities within the continuum of service.

Key Workforce Issues

Active Component, Reserve Component, and National Guard:

USSOCOM's Active Component personnel requirements are driven by its force structure along with enabling and support capabilities. Appropriately trained, mission-ready SOF operators drive the readiness of SOF's Component commands and their warfighting capabilities. The world is becoming increasingly complex and uncertain. To maintain dominance in the Special Operations environment, there is a growing premium on the SOF operator and associated SOF support. For SOF, striking a balance of capabilities that are ready to meet our missions today, complemented by the additional investments that will enable us to sustain those capabilities into the future is critical.

a. Active Component. USSOCOM end strength of the Active Component which comprises Army (31,211), Air Force (14,924), Navy (9,467), Marines (3,388), and Space Force (19) for a total of 59,009 in FY24. This represents all approved Memorandums of Agreements with the Services approved through OSD during the Program Objective Memorandum 24-28 cycle, for specified increases and reductions in particular areas associated with meeting and expanding capabilities and capacity to meet Strategic objectives. USSOCOM continues to coordinate with the Services, Joint Staff, and OSD on any future realignment or growth initiatives.

b. Army National Guard. By the end of FY24, the Army Guard will achieve an end strength of 4,301.

c. Army Reserve. By the end of FY24, the Army Reserve will achieve an end strength of 559.

d. Air Force Reserve. By the end of FY24, the AF Reserve will achieve an end strength of 1,300.

e. Air National Guard. By the end of FY24, the Air National Guard will achieve an end strength of 616.

f. Navy Reserve. By the end of FY24, the Navy Reserve will achieve an end strength of 1187.

g. Marine Reserve. By the end of FY24, the Marine Corps Reserves will achieve an end strength of 8.

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size* | Associated Cost |
|-------------------------|-------------------------|-----------------|
| Current Year (FY 2023): | 6,826 | \$1,037.44 |
| FYDP Year 1 (FY 2024): | 6,875 | \$1,065.78 |
| FYDP Year 2 (FY 2025): | 6,784 | \$1,072.71 |
| FYDP Year 3 (FY 2026): | 6,740 | \$1,087.06 |
| FYDP Year 4 (FY 2027): | 6,711 | \$1,104.03 |
| FYDP Year 5 (FY 2028): | 6,711 | \$1,126.11 |

* Total SOF enterprise Civilian manpower

In keeping with efforts to right-size the Total Force, USSOCOM will continue to manage the civilian workforce appropriately to meet budget levels and legislative mandates. USSOCOM will manage the risk to the force by continuing to focus on readiness. Given that readiness encompasses the various Title 10 functions specified in the Goldwater-Nichols Act it becomes especially important to ensure we have the right people with the right skills in the right positions and locations.

USSOCOM is committed to a thorough review of contract spending to ensure an integrated Total Force management effort. USSOCOM did not transfer any functions between contractors, civilian, or military end strength in Program Budget 24. Any future recommended reductions will be closely analyzed to ensure the least amount of risk while still maintaining or increasing efficiency levels.

Conclusion

USSOCOM is committed to developing the premier Special Operations Force in the world today. SOF is continuing to maximize its resources while maintaining and striving to increase the overall readiness of the force. Creating the optimal force will require continuous process improvement in all areas, coupled with in depth analysis of manpower requirements, with the goal of identifying any efficiencies, without any decline in mission effectiveness. SOF will continue to recruit and retain the best candidates possible for special operations personnel, both as operators and support. The goal being to find the right balance in active, reserve, guard, civilian, and contractors. These will remain major challenges now and into the future.

United States Southern Command (USSOUTHCOM) Manpower Narrative

Introduction

USSOUTHCOM is a Joint Military Command supporting U.S. National Security Objectives throughout the Western Hemisphere. The command is comprised of approximately 1,548 military and civilian personnel (including DIA intelligence billets), representing the Army, Navy, Air Force, Marine Corps, Space Force, Coast Guard, and several other federal agencies. The Services provide USSOUTHCOM with component commands which, along with Joint Task Force – Bravo, Joint Task Force – Guantanamo Bay, Joint Interagency Task Force – South, Security Cooperation Organizations, and Inter-American Defense College perform USSOUTHCOM's mission and security cooperation activities.

Strategic Priorities, Goals, and Challenges

USSOUTHCOM leverages rapid response capabilities, partner nation collaboration, and regional cooperation within its AOR to support U.S. national security objectives, defend the Southern approaches to the United States, and promote regional security and stability. USSOUTHCOM is responsible for providing contingency planning, operations, and security cooperation in the assigned AOR which includes Central America, South America, and the Caribbean (except the Bahamas, U.S. commonwealth, territories, and possessions). It is also responsible for the force protection of U.S. military resources at these locations and ensuring the defense of the Panama Canal.

USSOUTHCOM is committed to advancing national interest both at home and abroad. As the command adapts to the evolving security environment, it is shifting its central focus from disrupting illicit commodities to degrading the growing influence if external malign state actors, countering transnational threat networks threatening regional stability across the southern approaches to the U.S. Homeland, and supporting interagency post-disaster efforts to alleviate human suffering. The command's refined focus requires that we better understand the security environment, cultivate a friendly network of allies and partners, and undertake all our activities as part of a comprehensive joint effort - one that spans the Joint Force, interagency, intergovernmental, multinational, and nongovernment elements.

USSOUTHCOM has entered a period requiring operational flexibility to accommodate the uncertain nature of resources and funding availability. Under these conditions, meeting USSOUTHCOM's goals will demand a disciplined approach to executing resource allocations. USSOUTHCOM's intent is to ensure support to broader global challenges and leverage our talent, expertise, innovation efforts, to make substantive contributions to our Nation's security.

Key Workforce Issues

As threats to U.S. national security have taken on a multi-domain and global nature, USSOUTHCOM contends with state actors whose ability to threaten the homeland has increased in scope, scale, and severity.

Historically, USSOUTHCOM has experienced joint military shortages in the intelligence field, particularly in the analyst and imagery specialties. Additionally, the Services do not possess a sufficient pool of school trained warfighting planners to support the demand to fill our Advanced Joint Warfighting Planner trained billets (Joint Advanced Warfighter School, School of Advanced Military Studies, School of Advanced Air and Space Studies, School of Advanced Warfighting).

Finally, the manning processes at USSOUTHCOM's small unit embassy outposts need to improve to reduce manning shortages and gaps. At many of these units, one vacancy represents 20% or more of the military workforce creating capability gaps and risks.

<u>Civilian</u>

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 566 | \$86 |
| FYDP Year 1 (FY 2024): | 580 | \$93 |
| FYDP Year 2 (FY 2025): | 612 | \$101 |
| FYDP Year 3 (FY 2026): | 612 | \$103 |
| FYDP Year 4 (FY 2027): | 612 | \$105 |
| FYDP Year 5 (FY 2028): | 612 | \$107 |

Projected Size and Associated Cost (\$ in Millions):

The civilian strength of USSOUTHCOM reflects an increase to the FY24 FYDP based on approval to document 4 funded billets to our JTD because of USSOUTHCOMs new mission (Civilian Harm Mitigation Response) and approved Contract-to-Civilian-Conversion (CTCC) initiative (10). FY25 increased based on our JMVP submission of 8 billets Supporting new missions (6 Operational Contract Support Capability, 1 Detention Operations Analyst, and 1 Military Commissions Trials Logistics Coordinator), along with 24 CTCCs. Of note, the CTCC requirements (24) are directly linked to the descoping or termination of contracts to cover the civilian pay rates established.

USSOUTHCOM continues to maintain contractual support. Contractor personnel mainly support highly technical skills, information technology, certain intelligence functions, and information operations.

Conclusion

USSOUTHCOM is one of the smallest CCMDs and continues to lack the depth in structure and level of support garnered by larger CCMDs. However, USSOUTHCOM remains steadfast and driven towards cultivating a friendly network of allies and partners across the spectrum to attain regional security objectives and mitigate risk.

United States Space Command (USSPACECOM) Manpower Narrative

Introduction

USSPACECOM conducts operations in, from and to space to deter conflict, and, if necessary, defeat aggression, deliver space combat power for the Joint/Combined Force, and defend U.S. vital interests with allies and partners.

The establishment of USSPACECOM as the 11th combatant command demonstrates the critical importance America places on space. As the environment changes to reflect shifts in the geopolitical landscape, advances in technology, and new threats, space will remain a critical component of our way of life and to our national security.

Strategic Priorities, Goals and Challenges

Achieving space superiority sets the conditions to win in conflict across all domains. To win against increasingly capable competitors, USSPACECOM provides space combat power by fully integrating offensive and defensive operations alongside our longstanding allies and partners. The integration and synchronization of space capabilities and operations to achieve space combat power enables USSPACECOM, as part of the Joint/Combined Force, to deter, and if necessary, defeat adversary aggression, protect and defend the U.S. homeland and its interests, and secure long-term sustainable advantages. Ultimately, space combat power is how USSPACECOM ensures there is never a day without space.

USSPACECOM, in coordination with the Military Services, must develop and field increased numbers of military space professionals. Established Service military operational skills for space operations within US Space Force (13S, 5S0X1), US Army (FA40) and US Navy (1870) will require increased investment for recruiting, training, and developing space operators.

Key Workforce Issues

Component Workforce Authorization Allocation (PB24 Projection)

- > HQ STAFF 414 Military / 614 Civilians = 1,028 Total
- > JTF-SD/NSDC 84 Military /153 Civilians = 237 Total
- > CFSCC 102 Military / 89 Civilians = 191 Total
 - CSPOC 42 Military / 2 Civilians = 44 Total
 - MWC 41 Military / 6 Civilians = 47 Total
 - JNWC 9 Military / 44 Civilians = 53 Total
 - JOPC 7 Military / 20 Civilians = 27 Total
 - SIOD 3 Military / 17 Civilian = 20 Total
- > SELECTIVE RESERVE: 101 SELRES
- Contractor Workforce: 573 Contractors

Manpower: 600 Military / 101 SELRES / 856 Civilians / 573 Contractors = 2,130 Total Force

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 793 | \$112.4 |
| FYDP Year 1 (FY 2024): | 856 | \$121.4 |
| FYDP Year 2 (FY 2025): | 891 | \$128.8 |
| FYDP Year 3 (FY 2026): | 891 | \$131.4 |
| FYDP Year 4 (FY 2027): | 891 | \$134.0 |
| FYDP Year 5 (FY 2028): | 891 | \$136.7 |

Workforce Investment:

- USSPACECOM has implemented and continues efforts to secure the appropriate human capital talent.
- Hiring capabilities include civilian position classification authority and reallocation of funded authorizations to fill out-year funded positions.
 - Continued utilization of several programs to groom our future leaders (e.g., Recent Graduates, Palace Acquire, Intern, and Summer Hires).
 - Ongoing use, when available or applicable, of new or current Direct Hiring Authorities or Expedited Hiring Authorities in the Cyber and information technology fields.
 - USSPACECOM has taken advantage of Provisional Appointments of disabled veterans to expedite the hiring for civilian authorizations.

Workforce Risk:

USSPACECOM/J1 has utilized a funded civilian authorization to place an employee into the Civilian Personnel Office to assist with USSPACECOM on-boarding and hiring actions.

Congress authorized USSPACECOM to steadily increase its federal civilian employee hires each year to achieve a civilian end strength of 1,057 by FY25. Currently, we have less than 397 federal employees on board (42%).

Fast growth of the USSPACECOM headquarters is due primarily to contract support, which comprises nearly 1/3 of the staff. This is a temporary measure; USSPACECOM expects use of contracts to diminish as it onboards 500+ federal civilian employees through FY25.

No transfers of function have occurred between military and civilian. No military or civilian functions have been transferred to contractor workforces.

Conclusion:

USSPACECOM is a joint warfighting organization with uniformed and civilian representatives from all services and the nation's Intelligence Community. Three and a half years after reestablishment, USSPACECOM has approximately 500 military and civilian personnel assigned to the Headquarters, or just over 40% of our authorized end strength. USSPACECOM continues to align its work force to bolster operational capabilities presented by USSPACECOM joint centers. USSPACECOM uses these forces to achieve its key tasks: understanding our competition, building the command to compete and win, fostering and maintaining key relationships, maintaining digital superiority, and integrating commercial and interagency organizations. By achieving these key tasks, USSPACECOM will accomplish its mission.

United States Strategic Command (USSTRATCOM) Manpower Narrative

Introduction

USSTRATCOM deters strategic attack and employs forces, as directed, to guarantee the security of our Nation and our Allies. Should strategic deterrence fail, USSTRATCOM is prepared to deliver a decisive response with a resilient, equipped, and trained combat-ready force. The Commander's intent is for our campaign to set conditions across the globe as the ultimate guarantor of national and allied security. The Command, in support of meeting the NDS. leads strategic deterrence planning and develops an integrated, strategic approach that leverages an information advantage, assesses the risk of strategic deterrence failure within the global environment, and is prepared to provide a decisive response. Our Nation, the Department and Joint Force, and our Allies are looking for USSTRATCOM to provide continued leadership and security across the globe as we adapt to these challenges.

Component Workforce Allocation

- Headquarters 504 Military/940 Civilians/507 Contractors = 1,951 Total
- Joint Functional Component Command for Integrated Missile Defense 41 Military/71 Civilians/29 Contractors = 141 Total
- > Joint Warfare Analysis Center 34 Military/345 Civilians/47 Contractors = 426 Total
- > Joint Electronic Warfare Center 34 Military/88 Civilians/28 Contractors = 150 Total
- > National Airborne Operations Center 96 Military/3 Civilians/6 Contractors = 105 Total
- Cruise Missile Support Activity Pacific and Atlantic Commands 4 Military/0 Civilians/0 Contractors = 4 Total
- Nuclear Enterprise Center (NEC) 15 Military/158 Civilians/292 Contractors = 465 Total

Grand Total – 728 Military/1,605 Civilians/909 Contractors = 3,242 Total

Notes of Information above:

- Data above does not include MIP funded or Reserve billets.
- FY24 JTD data used for military and civilian numbers.

- NEC contractors decreased due to FY23 being last year of RDT&E funding for the \$12M Modeling & Simulation Enterprise Data Environment Development.

- Data above captures 4 billets which remain at CMSA PAC/LANT performing mission critical work for USSTRATCOM.

Workforce Investment:

- Continued improvement of USSTRATCOM's combat-ready force through training, education, and professional development.

- Improved synchronization of enterprise-level human capital initiatives to acquire, develop, and sustain USSTRATCOM workforce through the STRATCOM Strategic Human Capital Plan and the Human Capital Board.

- Implemented a workforce functional alignment initiative to examine the workforce to better understand needs from a skill-centric perspective; enabling USSTRATCOM to attract, develop, and retain a resilient and trained Combat-Ready Force in a rapidly changing strategic environment.

- Continued use of the STRATCOM Leadership Fellows program to groom future leaders. Effective utilization of other leadership programs such as the Strategic Deterrence Education Program, the Senior Civilian/Military Development Program, Harvard Fellows, University of Southern California's Global Space and Defense Program, Federal Executive Institute Program, IDE, etc.

- Use, when available or applicable, of new or current Direct Hiring Authorities or Expedited Hiring Authorities including, but not limited to, the cyber, information technology, budget, scientific, engineering, and mathematic fields.

Workforce Risk:

- Continued struggle to recruit, hire, and retain qualified cyber and information technology specialists due to competition of contractors and companies outside government service.

- Continued challenge to recruit, hire, and retain expertise for the NEC and the Electromagnetic Spectrum Operations Center (JEMSO).

- The TS/SCI security clearance requirements can push the hiring timeline out to a year or longer, greatly damaging the Command's ability to replace departing employees in a timely manner.

Key Workforce Issues

Civilian:

Projected Size and Associated Cost (\$ in Millions)*:

| | Current/Projected Size | Associated Cost |
|-------------------------|------------------------|-----------------|
| Current Year (FY 2023): | 1,587 | \$221.99 |
| FYDP Year 1 (FY 2024): | 1,594 | \$227.85 |
| FYDP Year 2 (FY 2025): | 1,605 | \$237.61 |
| FYDP Year 3 (FY 2026): | 1,605 | \$244.17 |
| FYDP Year 4 (FY 2027): | 1,605 | \$249.08 |
| FYDP Year 5 (FY 2028): | 1,605 | \$254.31 |

* Does not include MIP funded

Efforts taken to identify offsetting reductions:

- The Command continually self identifies areas of overlap and redundancy in order to offset mandated reductions.

-USSTRATCOM continues to review its missions and looks for ways to reduce the Commands overall size.

- Below are identified efforts taken throughout USSTRATCOM to avoid unnecessary growth:

- The Joint Manpower Validation Process (JMVP) thoroughly reviews and controls requested growth for areas increasing in size and mission

No transfer of functions has occurred between military and civilian and no military/civilian functions have been transferred to contractor workforces. USSTRATCOM continually reviews contracted workload and re-competes (where/when necessary) previous contracts due to an inability to acquire the precise expertise needed to perform the mission in-house.

Conclusion:

USSTRATCOM has continued to experience many changes/challenges the past years in both organization and manpower.

USSTRATCOM has several other emerging capabilities which they are developing and moving forward towards a program of record. Command rebalancing and ensuring the civilian/military workforce is stable and capable of maintaining and expanding STRATCOM's mission provides us the ability to manage all current/future initiatives for a limited amount of time. USSTRATCOM will continue to manage current and future missions by constantly having the ability to change and adapt.

United States Transportation Command (USTRANSCOM) Manpower Narrative

Introduction

The mission of USTRANSCOM is to conduct globally integrated mobility, lead the broader Joint Deployment and Distribution Enterprise (JDDE), and provide enabling capabilities in order to project and sustain the Joint Force in support of national objectives. The USTRANSCOM missions include the following:

- Joint Deployment and Distribution Coordinator: As the Distribution Process Owner and Global Distribution Synchronizer, USTRANSCOM provides extended authorities to coordinate operations and planning across all domains spanning the JDDE.
- USTRANSCOM oversees the provision of Joint Enabling Capabilities, performed by the Joint Enabling Capabilities Command (JECC). The JECC provides alert postured communications, planning, and public affairs capabilities to accelerate the formation of Joint Force headquarters. Delivering high-impact experts with knowledge in joint warfighting functions, the JECC supports Secretary of Defense-directed deployments as well as immediate Global Response Force missions. This Total Force team offers a unique capability not replicated by any other organization within DoD.
- **Mobility Joint Force Provider**, USTRANSCOM is responsible for providing joint sourcing solutions for all mobility forces and capabilities, in close coordination with the other Combatant Commands (CCMDs).
- DoD Single Manager for Patient Movement, USTRANSCOM enables America's unprecedented patient movement capability, and arranges timely and safe movement for the Nation's ill and injured in support of the CCMDs, other US government agencies, and key international allies and partners.
- **DoD Single Manager for Transportation**, USTRANSCOM provides common user and commercial air, land, and sea transportation, as well as terminal management and air refueling in support of deployment, employment, sustainment, and re-deployment.

Key Workforce Issues

To project combat power, USTRANSCOM relies on our nation's strategic strengths: our global command and control, our ability to project military power globally, and our deep bench of allies and like-minded partners that have stood with us for over 75 years in defense of freedom. USTRANSCOM exists as a warfighting combatant command to project and sustain combat power at a time and place of the Nation's choosing. We must never forget the primacy of warfighting effectiveness, while remaining responsible stewards of our Nation's resources. The collective strength of USTRANSCOM depends on our people -- warrior focused, agile, innovative, and able to adapt at the speed of relevance. To effectively achieve our priorities of warfighting readiness, cyber domain mission assurance, evolving for tomorrow, and achieving advance decision making, USTRANSCOM will reskill and upskill its existing working capital funded civilians. The intent is

to ensure its workforce is operating at maximum efficiency, seeking to leverage internal resources before considering cost increases. The net effect is a predicted decrease to overall working capital costs, lowering transportation cost to the Armed Services and delivering maximum value to the warfighter.

USTRANSCOM continues to utilize the DoD's Workforce Rationalization Plan as the guiding light in how they manage personnel resources. The minor growth in the out years is associated with adding positions to support the Civilian Harm Mitigation program.

Civilian:

Projected Size and Associated Cost (\$ in Millions):

| | Current/Projected Size | Associated Cost |
|-------------------------|-------------------------------|-----------------|
| Current Year (FY 2023): | 169 | \$22.1 |
| FYDP Year 1 (FY 2024): | 171 | \$22.9 |
| FYDP Year 2 (FY 2025): | 171 | \$23.5 |
| FYDP Year 3 (FY 2026): | 171 | \$24.1 |
| FYDP Year 4 (FY 2027): | 171 | \$24.7 |
| FYDP Year 5 (FY 2028): | 171 | \$25.2 |

Conclusion

USTRANSCOM primarily operates utilizing the Transportation WCF. Every effort is taken to ensure USTRANSCOM maintains a best value cost to its customer, the warfighter. This involves a continuous, active review of its workforce mix with return on investment to warfighting readiness as their primary guiding principle. The Command's civilian workforce is trending toward level across the FYDP, and efforts to utilize existing resources through training and development of USTRANSCOM personnel will enable USTRANSCOM to continue the trend. The Command's comprehensive strategic human capital lifecycle continues to ensure resources are aligned properly against existing and evolving mission priorities.

Chapter 5: Promotion Plans

The anticipated opportunities for promotion of commissioned officers, for purposes of Service promotion boards for this past FY and future program years, are shown below:

Army:

| DA | | Personnel Plan | | | | | | | |
|-----------------|-------------|---|----------------|-------------|-------------|--------------|----------|-------|--|
