c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

MilGears provides Service Members, Veterans, Military Family members, and interested civilians with an assessment of their qualifications and professional growth opportunities using aggregated military and civilian occupational and credentialing data. The system provides users with customized output regarding potential civilian and military career paths, apprenticeships, certifications, continuing education, and more to allow users to explore potential new career pathways.

The following personal information is collected in the system: Full name, personal or work email address, age, rank, DOD ID Number, employment information, military records, and education/training information and transcripts. This data, however, is not maintained once the user closes out their session. In order to continue where one left off, the user must download the session file and re-upload the file when they wish to continue. These files are password protected and encrypted, and only readable by MilGears.

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

MilGears is a customized career-building tool that performs an assessment of user's qualifications and professional growth opportunities using aggregated military and civilian occupational and credentialing data. Therefore, PII such as education history, employment history and military records are needed in order for the system to help users plan and achieve their goals by highlighting career possibilities.

e. Do individuals have the opportunity to object to the collection of their PII? Yes No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

The user is not required to input any data in order to use MilGears. However, for personalized/customized results based on the unique individual/user, the more input that is entered, the better the output/results.

f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

MilGears contains several tools that uses PII. The user has the option to clear their data before switching between tools allowing them to use a tool without their PII. No PII is stored and maintained once a user closes a session.

g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided. (Check as appropriate and provide the actual wording.)
