c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

The Voluntary Education (VolEd) office utilizes a customer relationship management solution to manage communications with educational institutions who have signed a DoD Voluntary Education Partnership Memorandum of Understanding (MOU) with the Department in order to participate in the DoD Tuition Assistance program, which provides education benefits to active duty and reserve Service members. This system provides an organized central repository for communications between VolEd and these educational institutions, known as member institutions. The system also provides case management capabilities to ensure questions and issues submitted to the VolEd office are addressed effectively and efficiently and for the management and tracking of the Institutional Compliance Program (ICP) process.

The DoD VolEd MOU Partnership Institutional Compliance Program (ICP) is a full-scale, risk-based compliance program that assesses institutional compliance with these standards, in order to reduce risks associated with non-compliance. Each year, the ICP team considers the entire population of MOU signatories, leveraged over 24,000 pieces of data to narrow the population from over 2,700 to 250, and then conducts an in-depth assessment on those 250 institutions. The team then provides critical feedback to those institutions to enable them to implement Corrective Action Plans to improve their individual level of compliance with the tenets of their MOUs, utilizing the VolEd Customer Relationship Management Compliance Tool to assist with this assessment and communication.

To support these functions, publicly available data is collected from users of the application used to facilitate DoD Voluntary Education Partnership MOU Signatures, the Department of Defense Memorandum of Understanding (DoD MOU) Application, to grant these same users access to the VolEd Customer Relationship Management Compliance Tool, as required. College/University personnel who interact with the DoDMOU system provide names, professional email address, work phone numbers, and title/department, as points of contact for each member institution. This is publicly available information available from public websites. Once collected, it is used to identify and communicate with users of the VolEd Customer Relationship Management Compliance Tool system.
